Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	90.00% (9 of 10)
1	The discussions and simulations.
2	Lectures
3	In-class discussion was the primary form of assignment the class had had for the semester.

4	In class discussion	
5	I think the most effective assignments were probably the research paper and group project.	
6	Homework assignments	
7	Homework assignments and group projects.	
8	Group presentation	
9	For me personally, the in-class discussions were the most effective.	

Q3 - What other class activities could have helped you to learn the course material?		
Faculty: William O'Brochta		
Response Rate: 80.00% (8 of 10)		
1	The notes that we had taken expanded the information in politics.	
2	Nothing	
3	Nothing really, we did a plethora of activities. This helped me learn through more ways than just test.	
4	Not really	
5	More help with essays	
6	Idk	
7	Honestly, if some of the readings were more focused on how the different government structures worked then I think I'd have a better idea, but man that would be really boring.	
8	Field work

	Responses					Individual				
	SA	A	N	D	SD	N	Mean	Med.	Mode	Std Dev
Q4 I learned a lot about the subject in this course.	4	6	0	0	0	10	4.4	4	4	.49

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

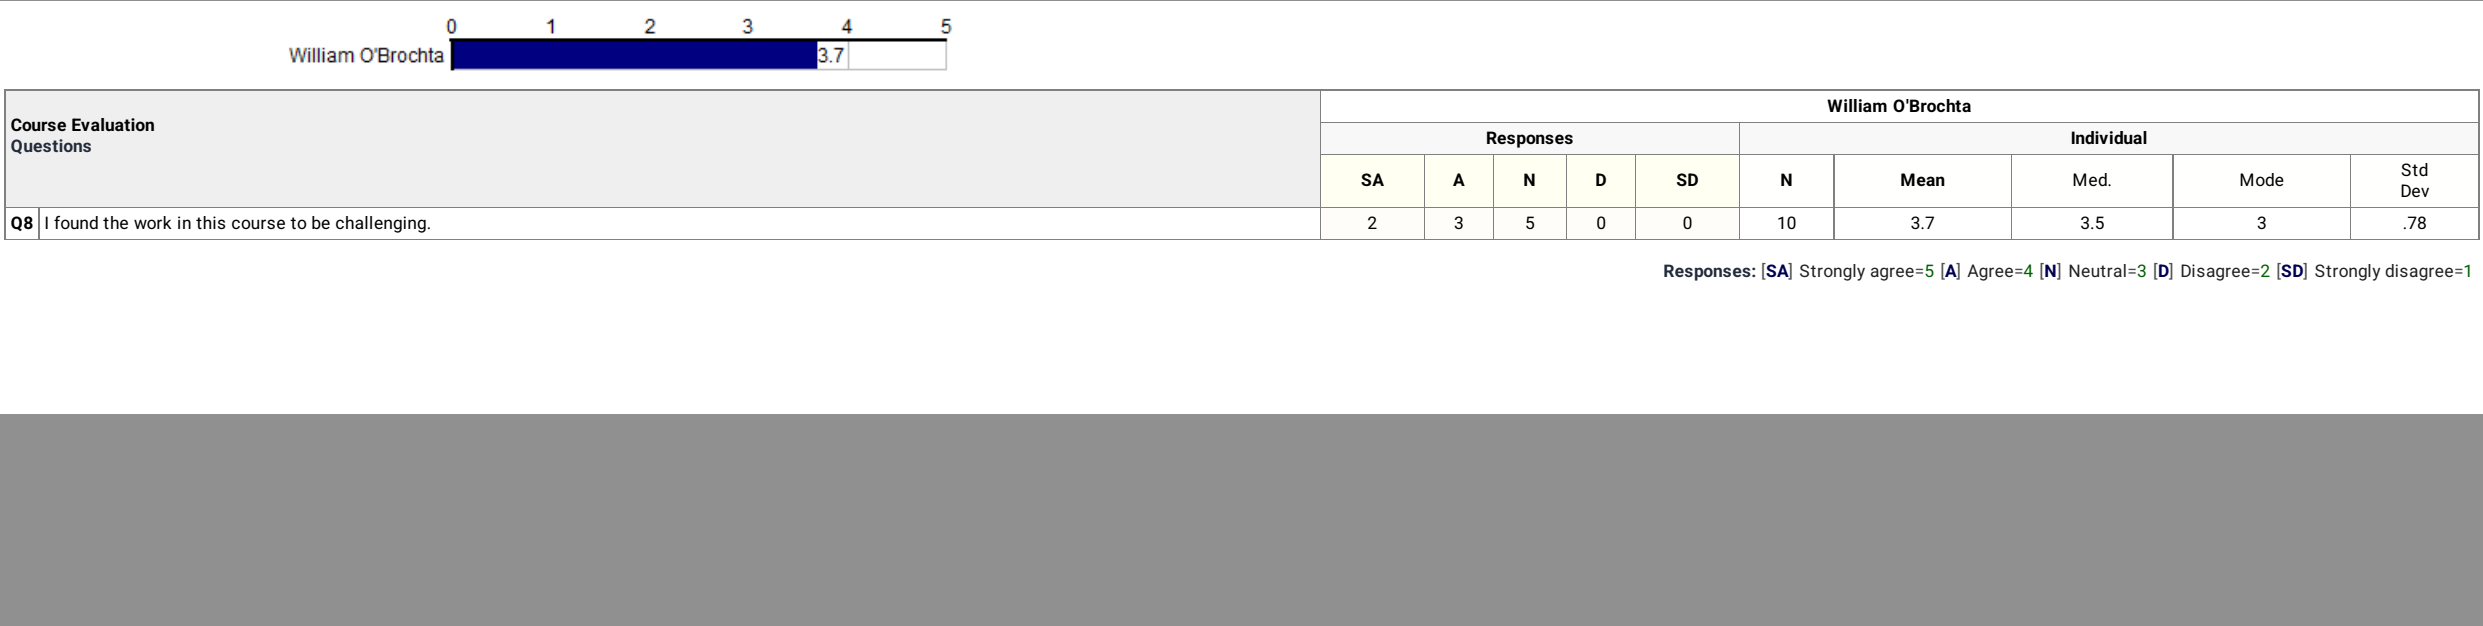

Q5 - Please explain your answer to the previous question	
Faculty:	William O'Brochta

Response Rate: 60.00% (6 of 10)	
1	Learned pretty good amount
2	Learn more of how politics in general work then the basics.
3	I think I learned a lot about researching and how that process works. I found it really beneficial to struggle through the assignment.
4	I learned a lot about policy's and politics
5	He taught the class very well and I understand more things about political science.
6	By using different methods of teaching, I was able to learn effectively.

Course Evaluation Questions						William O'Brochta									
						Responses					Individual				
						SA	A	N	D	SD	N	Mean	Med.	Mode	Std Dev
Q6	I felt comfortable that I could approach the instructor either electronically or during office hours.					4	5	1	0	0	10	4.3	4	4	.64
Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1															

Q7 - Please explain your answer to the previous question	
Faculty: William O'Brochta	
Response Rate: 60.00% (6 of 10)	
1	he's not that much of a powering figure in terms of not wanting to see him in his office.
2	Yeah
3	I felt comfortable just showing up to his office if I needed.
4	I could approach Dr. O'brachta
5	I could always ask him for help with my work if I didn't understand it.
6	DR. O'Brachta was very open to having discussions about our projects and giving helpful insight.

Q9 - Please explain your answer to the previous question	
Faculty:	William O'Brochta
Response Rate:	60.00% (6 of 10)
1	not hard
2	The material was not that hard to learn.
3	Some were challenging some weren't. Mostly the class was time-consuming.
4	Some of it was
5	It just felt like a lot
6	I think work load and the material challenged me but also wasn't really hard.

Q11 - Please explain your answer to the previous question		
Faculty:	William O'Brochta	
Response Rate:	60.00% (6 of 10)	
1	sometimes I had gotten confused but worked through it.	
2	Yes	
3	I think he always gave us enough time to complete work for his class.	
4	He was pretty detailed on all the assignments feedback about what I did well what I did poorly.	
5	Dr. O'brachta gave good feedback	
6	DR. O'Brachta gave great feedback on every assignment we did.

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	92.86% (13 of 14)
1	papers
2	in-class discussion and assignments helped me understand the class better.

3	group projects	
4	The in class discussions.	
5	Simulations exercises allowed me to learn better because seeing things first hand is how I learn best.	
6	Probably the lectures and discussions	
7	In- class assignments	
8	In class discussions	
9	I would say the online annotations, his lectures were extremely interactive as well and the group projects taught me a lot.	
10	I think the activity that helped me the most was the PowerPoint presentation. The lectures helped a lot to understand the concept. The small group activities also were a lot of help and made you think for yourself.	
11	I enjoyed the in-class discussions we had because they were always engaging.	
12	Group projects and lectures	
13	Group projects	

Q3 - What other class activities could have helped you to learn the course material?		
Faculty: William O'Brochta		
Response Rate:	71.43%	(10 of 14)
1	nothing really much	
2	n/a	
3	everything good	
4	Use of PowerPoint presentations	
5	The overall helpfulness of the professor has helped me throughout the class.	
6	More videos, because videos are beneficial.	
7	More in depth slides and explaining the material more in depth.	
8	I think he did an amazing job with his course material I wouldn't add anything	
9	I think everything that was done for this class was very helpful. I do not have any other suggestions on what to add for this class.	

10	I think all that I needed was included

Q5 - Please explain your answer to the previous question		
Faculty:		William O'Brochta
Response Rate:		64.29% (9 of 14)
1	ive learned a lot about politics, more than what I knew before coming here.	
2	While I feel like I had a pretty good basic understanding of how politics work in America, I did find things I didn't know before.	
3	This course was very confusing in what we were learning, it would jump all around and not be consistent with what we would be doing.	
4	There was a lot of material covered in this class, and I learned a lot. Dr. O'Brochta did very well at explaining the concepts.	
5	I will say I am no expert on the topic but I did gain a bit of information while having fun at the same time	
6	I think his teaching style and personality made the learning environment great.	
7	I learned way more than I was expecting too and actually thoroughly enjoyed going to class.	
8	I have learned a lot of skills taking this class.	
9	Coming into this class I knew virtually nothing about political science but now I have a decent, wide understanding of the topics.

Q7 - Please explain your answer to the previous question	
Faculty:	William O'Brochta

Response Rate: 57.14% (8 of 14)	
1	The professor was very helpful and open to ask dfor help when needed.
2	I was able to meet with my professor after he reached out in concern of my grade so that was helpful.
3	I think his teaching style and personality made the learning environment great.
4	He was easy to talk to.
5	Dr. O'Brotcha was a little scary to me, because he was very persistent on doing everything the right way and correct and didn' really help explain it well.
6	Dr. O' Brochta is very kind and he's very approachable
7	Dr. O'Brochta was always available to answer questions. He also responded quickly if you tried to connect with him electronically.

Q8	I found the work in this course to be challenging.	2	7	5	0	0	14	3.8	4	4	.67

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

Q9 - Please explain your answer to the previous question	
Faculty:	William O'Brochta
Response Rate: 71.43% (10 of 14)	
1	he grades strict which I understand to an extent
2	at the beginning oi had trouble but then went and got help then understood
3	Yes, the work was challenging but in a good way.
4	While the subject matter isn't very difficult I found the amount of coursework to be, frankly, overbearing and tedious. While I believe the assignment were helpful in understanding the subject matter, I think the annotations could be set up better. I understand that it is set up this way to incentivize students to do more annotation, I think the grading policy is unrealistic and a bit harsh.
5	This course was very challenging to me, i this course jumped all around in the material so it made it very confusing to follow it and keep up with the material and understand it.
6	The work put me out of my comfort zone but had me think a lot and honestly benefitted me.
7	The material was not hard to learn, and the method of teaching was easy to understand.

Faculty: William O'Brochta	
Response Rate:	42.86% (6 of 14)
1	No students were left out in this course.
2	I think that everyone was treated the same in this class.
3	I felt included
4	I don't see how that relates to the class, but sure.
5	Dr. O'Brochta was a fun teacher. He was very respectful to every student and wanted us to do well.
6	.

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	83.33% (10 of 12)
1	lecture and homework assignments
2	doin work
3	The most helpful for me was in-class discussion and in-class assignments because it gave me examples I could use to help me on my homework.

4	The lectures were the most helpful part information wise because all of the content was being presented. However, I think it would have helped more if we played around in R more in the beginning of the course to help become more familiar with it. Like projection examples and check	
5	The in-class assignments were the most beneficial to me in learning the course material.	
6	In-class work.	
7	In-class discussions and reading annotations.	
8	In class assignments was the most effective espicly because it helped with outside work	
9	I really benefitted from the use of Powerpoint slideshows. He would also upload these powerpoint lecture onto Brightspace to revisit and I utilized that quite often.	
10	Applying our knowledge throughout the semester to create our article.	

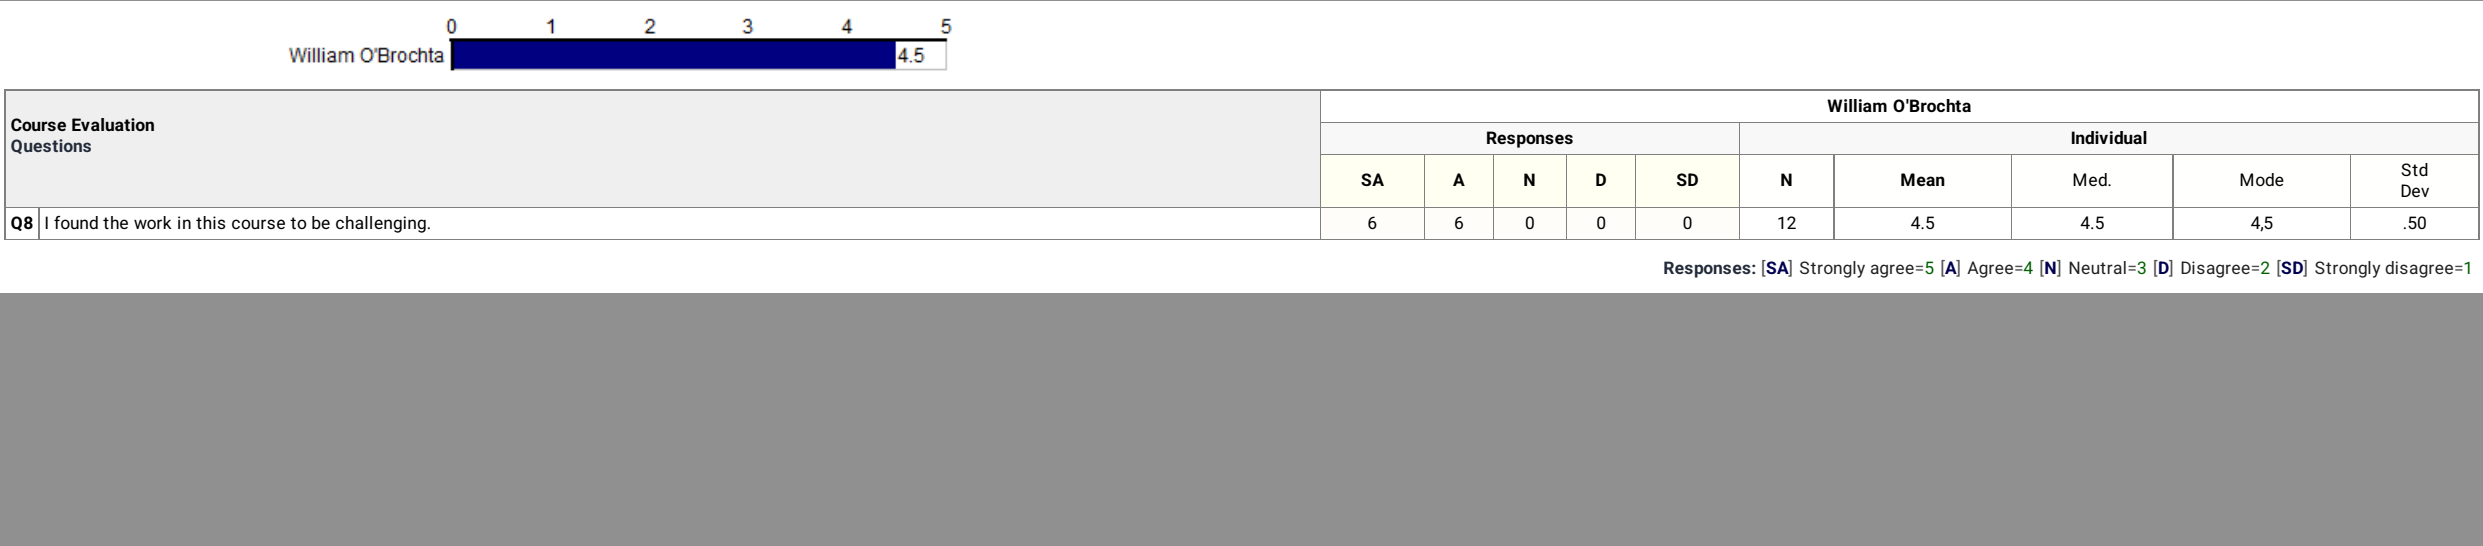

Q3 - What other class activities could have helped you to learn the course material?		
Faculty: William O'Brochta		
Response Rate:	75.00% (9 of 12)	
1	not doin work	
2	The examples in R during class were amazing.	
3	Slowing things down just a little. Although it is a upper level class there was a lot of different topics going on at once which was a little overwhelming but managed to finish through it!	
4	None	
5	None. My most preferred class activities were all utilized in this course.	
6	N/A.	
7	Lectures.	
8	It's hard I think because we all have different samples and goals to reach in our research but I wish we could have broken down code together more like a panel discussion so that we could identify functions more clearly.	
9	I do not know what other activities would have been beneficial to learning the course materials as I think that the resources we had were adequate enough.	

Q5 - Please explain your answer to the previous question		
Faculty: William O'Brochta		
Response Rate: 83.33% (10 of 12)		
1	hardest class n my life but it was good fr	
2	This class helped build on to my surface level knowledge of stats and overall research methods.	
3	Their was many things in my personal life that prevent me from learning in this course.	
4	I think I learned a lot about writing a research paper and how that is relevant to real world opportunities.	
5	I learned how to code which most people will never learn or know how.	
6	I learned a lot in this class.	
7	I have expanded my knowledge on research and the process of creating a research paper	
8	I feel as though I learned a lot about social science research in this course, without a doubt. I still do not feel as though I am very well-versed in R code (not enough to say "strongly agree", at least)	
9	I certainly learned a lot in this course about research and data analysis.	
10	Even if it felt treacherous 90% of the time when I was *IN* the class, by the end of the semester, I was so thankful because it taught such valuable aspects in social science and refining current skills.	

Q9 - Please explain your answer to the previous question		
Faculty:		William O'Brochta
Response Rate:		66.67% (8 of 12)
1	hardest class n my life	
2	Yes, because I had never done research on any level before. It wasn't a lot of work but it was challenging work that took a lot of time and effort to complete.	
3	This is a senior capstone course, so naturally, it is going to be a challenge.	
4	This class has been incredibly challenging and has really pushed me. I almost wish this class was a month or two longer, as I really felt overwhelmed and rushed at times. I think this class is also a lot of learning through immersion, and just having to push through and do things even when challenging. Undoubtedly this class was hard, but I learned a lot through it that will benefit me in the long run.	
5	It was difficult because it was new and a high word count, but it was needed	
6	I no longer dread, despise, and curse at RStudio. I actually have begun to enjoy it.	
7	I had never covered material like this before.	
8	I Think i struggled more just because this format to this class was not like any other one I took in the department so it was a bit of a culture shock in the beginning for me at least.	

Course Evaluation Questions		William O'Brochta

		SA	A	N	D	SD	N	Mean	Med.	Mode	Std Dev
Q10	I was given clear and helpful feedback about my performance in the course in an appropriate amount of time to improve my performance in the course.	8	3	1	0	0	12	4.6	5	5	.64

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

Q11 - Please explain your answer to the previous question

Faculty:	William O'Brochta
Response Rate:	50.00% (6 of 12)

1	yah	
2	Yes, lots of constructive feedback is given and if you have any questions, you are encouraged to go ask about it/talk it over.	
3	Sometimes I feel this course can feel like you're on your own and unless you seek help you wont get it. what i mean is its easy to fall behind the rest of the class if you're not diligent.	
4	He gave us amazing feedback in the comment sections of our assignments	
5	He always provides, detailed, clear and helpful feedback for every major assignment. He also gives students to opportunity to meet with him to receive feedback on ongoing assignments or revised passed assignments.	
6	Between office hours and detailed feedback, there was never any lack of communication on what was done well and what needed to be revised.	

Course Evaluation Questions		William O'Brochta

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

Q13 - Please explain your answer to the previous question

Faculty: William O'Brochta	
Response Rate:	50.00% (6 of 12)
1	yup
2	yes.
3	Very open to all students
4	Most of us disliked the class BUT we all understand the purpose of the skillset being taught within the material! "Just trust me, it will all make sense at the end of the semester." - Dr. O'Brochta **hint, you were right. Even if we complained to whole way through :)
5	Instructor knows the students and make connections to their interests/backgrounds.
6	He is very inclusive to different minority groups as shown through intentional language and class content.

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	100.00% (11 of 11)
1	in class discussions
2	The lectures
3	The group projects helped me get to be engaged with my classmates.

4	Lectures	
5	Lectures and homework assignments.	
6	I think the group work helped me understand the topics the most.	
7	I think the in-class discussions were the most helpful because they involved the most content.	
8	I enjoyed our simulation exercises. We often would simulate the federal government and I enjoyed it. I also enjoyed our in class discussions.	
9	Homework	
10	Group projects	
11	All of them	

Q3 - What other class activities could have helped you to learn the course material?

Faculty:

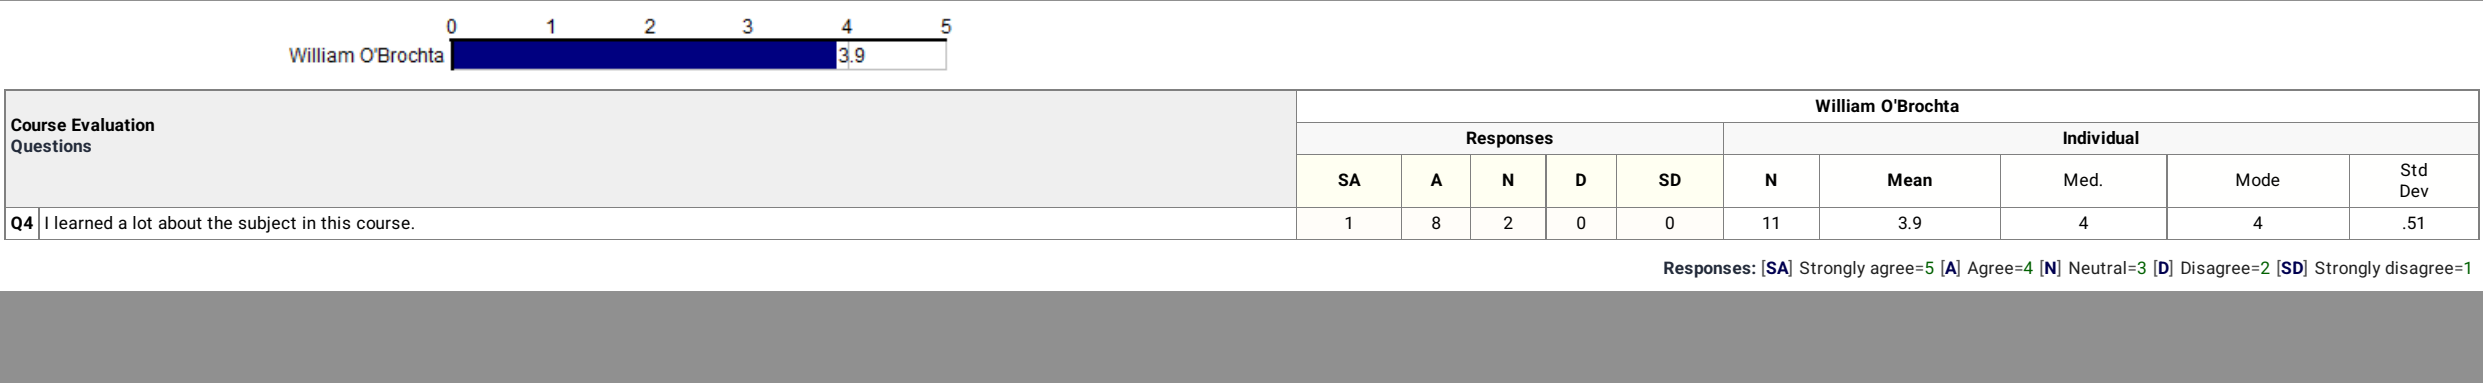

William O'Brochta

Response Rate:

100.00%

(11 of 11)

1	Project	
2	None	
3	N/a	
4	N/A	
5	N/A	
6	N/A	
7	Maybe reading from a consistent source rather than multiple.	
8	I'm not the best at politics or anything related to it so I'm not sure what could've made this easier because of how challenging it was. It was a good class, but it definitely was challenging.	
9	I think he had a good variety	
10	I feel like the activities we did where good enough	
11	Better on oral presentation	

Q5 - Please explain your answer to the previous question		
Faculty: William O'Brochta		
Response Rate: 100.00% (11 of 11)		
1	N/A	
2	I thought it was a good course and I learned a lot	
3	I learned how much politics control our daily lives	
4	I learned that staying in politics and having an idea of what's going on is valuable and important.	
5	I learned a lot of different things about the government and how it is run	
6	I learned how to write a research memo. I also learned why American Politics matters to U.S. Education.	
7	I learned about the mindset and approach of the governement. Rather than just learning about checks and balances	
8	I learned some but not really cause the course work wasn't explained good I was expected to already know	
9	I did pretty well at learning through the different methods used and am now more educated on politics.	
10	I did learn a lot, but I also had a government class the year prior.	
11	I came in to this clsss thinking that I wasn't going to enjoy it but over time I actually was very interested on the different views and other perspectives of values

Q7 - Please explain your answer to the previous question

Faculty:		William O'Brochta		
Response Rate:		90.91% (10 of 11)		
1	no explanation needed			
2	The instructor was nice and willing to talk to you if needed			
3	Professor O'Brochta was very willing and open to do office hours and never turned me away.			
4	I never approached him			
5	I didn't go to office hours but if I needed to then I would have felt welcopme.			
6	I did come talk to him about a project once			
7	He was very nice and helpful the whole semester.			
8	He was always easy to get in touch with.			
9	Dr. Brochta is a nice and supportive professor.			

10

Clear discussions.

Course Evaluation Questions	William O'Brochta										
	Responses					Individual					
	SA	A	N	D	SD	N	Mean	Med.	Mode	Std Dev	
Q8	I found the work in this course to be challenging.	3	2	5	1	0	11	3.6	3	3	.98

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

Q9 - Please explain your answer to the previous question	
Faculty:	William O'Brochta
Response Rate:	100.00% (11 of 11)
1	some of the work was hard and some wasn't but it was fine
2	some of it seemed like busy work, having to do 5 annotations, I'm not saying they were pointless but I don't think there should have been a minimum because people just did 5 and stopped reading or did not read at all and just responded to others
3	This class was very challenging.
4	The assignments where straight forward
5	Some of it was hard, but it challenged me to think logically.
6	N/A
7	It was very challenging with no details on certain assignments
8	It was a lot of work.
9	I'm not a political person so this challenged me a lot.
10	I found it difficult to complete the research memo for this class. I also found it difficult to do the reading annotations for this class.
11	I didn't think it was too hard, I thought it was what it should be

Q11 - Please explain your answer to the previous question		
Faculty:	William O'Brochta	
Response Rate:	100.00% (11 of 11)	
1	we had plenty of time to do the research memo	
2	Yes very good	
3	The professor gave good feedback in a very quick manner.	
4	Professor O'Brochta was very helpful and made it very clear what his expectations were.	
5	N/A	
6	He provided help when needed and had good instruction	
7	He provided feedback with the grades	
8	He had it on the website and it would tell you what you have in the class	
9	He always gave me helpful feedback.	

10	Dr. Brochta gave me detailed and supportive feedback that helped me improve on various assignments like the research memo and reading annotations.	
11	Always gave feedback

Course Evaluation Questions	William O'Brochta										
	Responses					Individual					
	SA	A	N	D	SD	N	Mean	Med.	Mode	Std Dev	
Q12	I felt that student diversity was recognized and respected in this class.	2	8	1	0	0	11	4.1	4	4	.51

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

Q13 - Please explain your answer to the previous question	
Faculty: William O'Brochta	
Response Rate: 81.82% (9 of 11)	
1	my opinion was respected and heard 
2	We had multiple readings that talked about aspects of diversity 
3	N/A 
4	It was alright 
5	He was very nice and helpful 
6	He was very respecting of all people 
7	Everyone was equal. 
8	Everyone had a place to learn even if we weren't as educated on the subject. 
9	Dr. Brochta always made my classmates feel welcome by greeting them as they walked in class.

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	80.00% (12 of 15)
1	in class asignments
2	The simulation exercise was the most effective for the way that I learn.

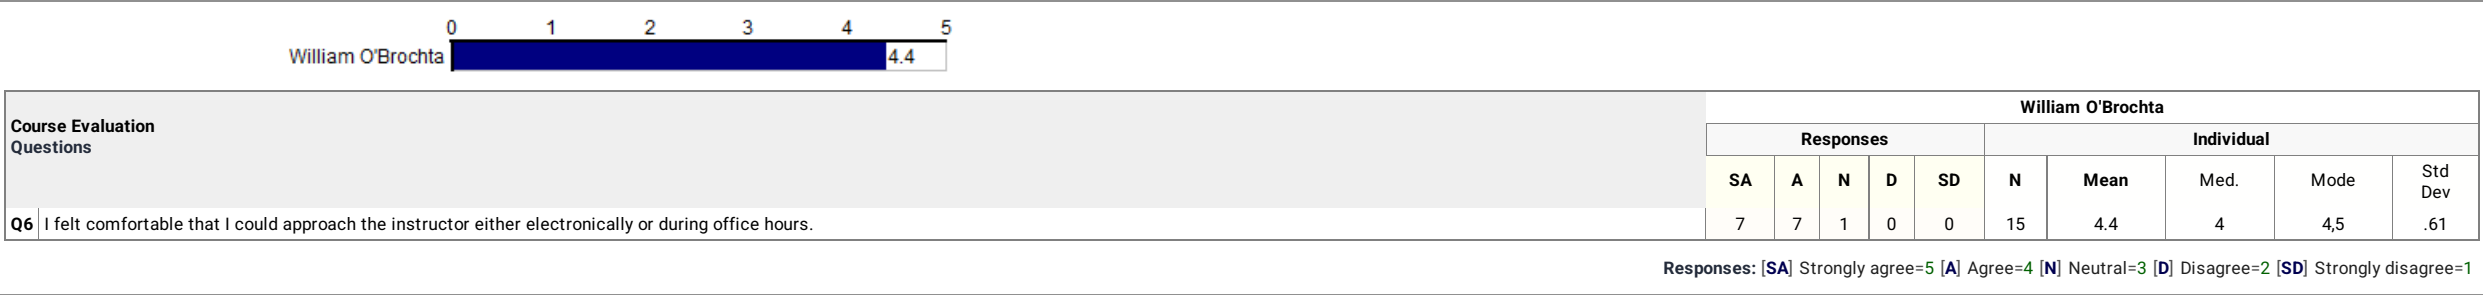

3	The in class lectures really helped me understand the material and he explained the bigger topics really in depth.	
4	Lecturing	
5	In class discussions	
6	In class discussions and activities.	
7	In class discussions	
8	I think the in class lectures were most effective.	
9	I really like for the essays we were given we were given a format	
10	Group work	
11	Collaborating with others.	
12	Class discussions	

Q3 - What other class activities could have helped you to learn the course material?		
Faculty: William O'Brochta		
Response Rate: 60.00% (9 of 15)		
1	Reading the syllabus.	
2	None this class was good	
3	N/a	
4	N/A	
5	Lecturing	
6	In class discussions helped me a lotto get involved and understand.	
7	I think the reading assignments helped me learn the course.	
8	I feel like what we did in class was enough to help me learn the material. We did a little bit of everything.	
9	Government jobs	

Q5 - Please explain your answer to the previous question											
Faculty:		William O'Brochta									
Response Rate:		66.67% (10 of 15)									
1	the class was very organized and a fun environment										
2	he is a cool teacher										
3	There were a lot that we did and he talked about subjects that students would most likely know.										
4	Just was not what I was expecting										
5	I feel neutral										
6	I don't like politics but Dr. Obrochta made me like to more										
7	I didn't know anything about politics before being in this class.										
8	I did not have a clue about politics before attending this class, now I can have an entire conversation about it.										
9	He made sure to help when we have questions and he is patient with us when we are confused.										
10	Before taking this class I thought I wouldn't like it or understand what was going on. But now that the semester is over I have learned a lot and enjoyed the class.										

Q7 - Please explain your answer to the previous question		
Faculty:		William O'Brochta
Response Rate:		73.33% (11 of 15)
1	Very nice and helpful.	
2	Office hour times were posted on the syllabus and he was very welcoming to help with any assignments or answer any questions.	
3	I would email if I needed anything	
4	I go in often	
5	I feel neutral	
6	He was very personable and a great person to go to when help was needed.	
7	He was very open and easy to contact when needed.	
8	He is oppen and trys to make the class fun	
9	He is kind and more than willing to answer questions.	
10	He is a good guy	
11	Dr. O'brachta was easily approachable and very respectful of everyone

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	84.62% (11 of 13)
1	the U.N simulations and reports
2	homework assignments
3	The simulation was the easiest to help understand the class material related to the UN simulation and to understand with the resolutions and implementation of them, to see and understand how justifiable they were and how they work and relate within the UN.

4	The group work and discussions were most effective	
5	The class discussions involved the ongoing work with the UN as a whole, with everyone talking and trying to work as one.	
6	Simulation exercise.	
7	In-class discussions, homework (reading annotations), and our UN Simulation (which was very engaging).	
8	In-class discussion.	
9	In-class discussions and lectures.	
10	In-Class Discussion this is due to we had to do reading for that class and we would have a discussion on that topic	
11	I loved the writing assignments in class though they were difficult. I felt that I learned more from the research we did than just the UN simulations. For me, the simulations were fun but were not nearly as impactful as the writing assignments.	

Q3 - What other class activities could have helped you to learn the course material?		
Faculty: William O'Brochta		
Response Rate: 61.54% (8 of 13)		
1	unsure, fairly diverse class.	
2	n/q	
3	more class time to work on projects	
4	maybe lectures beforehand rather than after so that we can understand the topics. for example if the U.N meeting has the topic of electoral systems, we could discuss electoral systems first, then have U.N the class after.	
5	The lectures but mainly the UN Simulation	
6	Maybe some quizzes in the course over small portions	
7	Maybe more lectures	
8	I believe more powerpoint presentations would have been nice.	

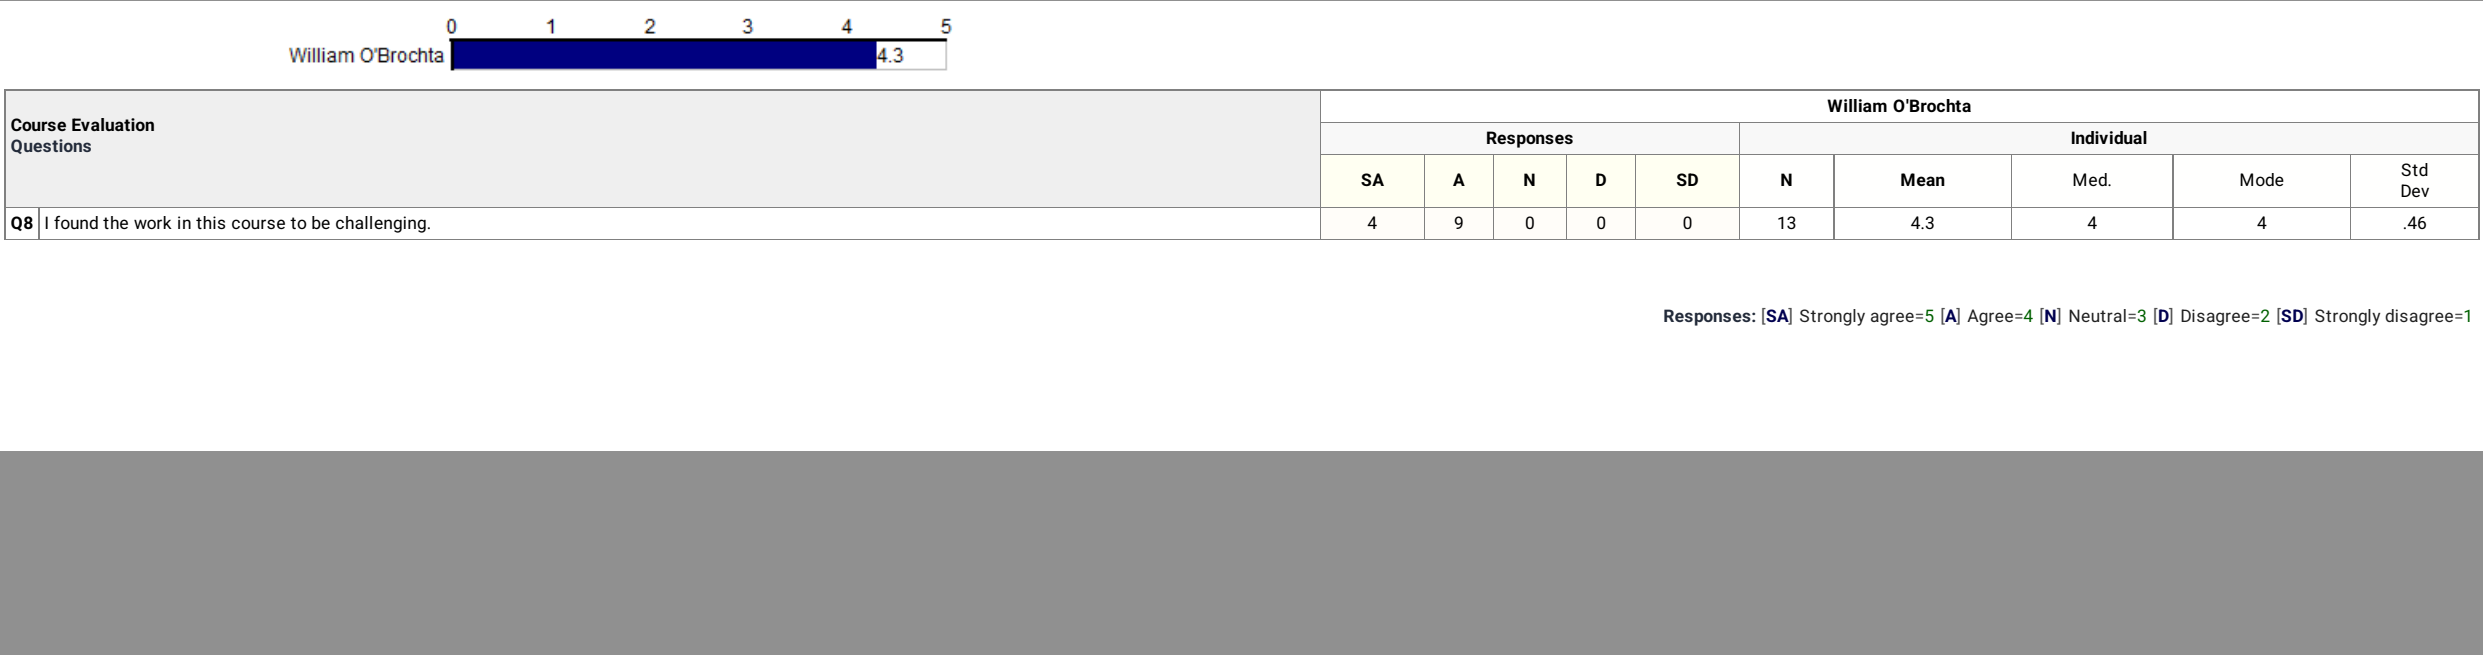

Q5 - Please explain your answer to the previous question		
Faculty:		William O'Brochta
Response Rate:		76.92% (10 of 13)
1	Yes, I learned a lot through the UN simulation in particular and seeing how resolutions are written, amendments and negotiations are made, etc.	
2	We go over a multisite of different topics, all which have given me the ability to learn so many different things. Dr. Obrochta is an excellent teacher that helps so much.	
3	This course pushed me so hard, however, it was more hands on learning than learning specific information which I appreciated. I feel like I learned more on how to interact and work with others, and do research, than I did any one specific topic.	
4	The course taught me a lot about how other countries interact with each other and how they differ from American politics	
5	The course was really engaging and gave a lot of insight into the topics we learned.	
6	Learned the in's and out's of how the UN works as one unit to build a better world	
7	It was a ton of information where we actually used it	
8	I'm not sure what I have actually learned in this class. A lot of the material was above my level of understanding.	
9	I learned quite a bit about the workings of non-American nations.	
10	I felt I had zero understanding of the UN until this class and once we did the simulation I felt I completely understood a brief idea of the UN itself.	

Q7 - Please explain your answer to the previous question															
Faculty:		William O'Brochta													
Response Rate:		76.92% (10 of 13)													
1	n/a														
2	Yes, office hours are clearly communicated and Dr. O'Brochta is great about talking with students before and after class or finding another day/time that works.														
3	Our instructor was always kind and welcoming.														
4	If I ever have an issue I know I can go to hime for help. His doors are always open.														
5	I wish I could put strongly STRONGLY agree. Dr. O'brochta is one of the most relate teachers at TLU. Not only is he almost always in his office but he also allows every student to stay as long as they need to until they understand the information completely. This aspect SAVED me while in this class.														
6	I went to him if I needed														
7	I emailed and asked questions during/after class.														
8	Dr. O'Brochta is very easy to talk to and he helps us if needed. Office hours are very accessible and he is quick to respond to his emails.														
9	Dr. O'Brochta was always supportive and there whenever we needed help in our coursework														
10	Dr. O'Brochta is very knowledgeable and personable. He was very timely with his responses and seemed very willing to discuss material and to assist students.														

Q9 - Please explain your answer to the previous question											
Faculty:		William O'Brochta									
Response Rate:		84.62% (11 of 13)									
1	Yes, the structure was not new to me but the content challenged me. Assignments required meaningful research and reflection.										
2	Very challenging, the work load was a lot to handle.										
3	This was due to me not really ever doing assignments like this										
4	Some of the writings were difficult due to the works being different from other writings that I have worked on in the past										
5	It was challenging but had enough instruction to be done properly.										
6	I think the work was challenging but not to the point of unfinished work. It was hard but I also learned a lot from the work.										
7	I think his work is hard enough but too hard that I think it's impossible to do.										
8	I strongly believe that the workload and the required political science background knowledge necessary for this course was far beyond what it should have been for a 200-level course. This course was the most academically challenging and time-consuming course I have taken at TLU. The amount of work, expectations, and grading was absolutely beyond what should be expected from this course. I do not want to complain but I cannot stress this enough.										
9	I did a lot of new kinds of assignments that I had not done before and struggled a bit in learning. This was helpful though as the things we did in this class will be used in classes like 433.										
10	For a 200-level class, the work seemed to be way more challenging than I expected it to be. This would be something I would expect from a 300-level course. And I felt like, as an education major, I really didn't benefit from this course as I thought I would have.										

Q13 - Please explain your answer to the previous question		
Faculty: William O'Brochta		
Response Rate:	61.54% (8 of 13)	
1	yes, our instructor was very kind to everyone and discussed all topics respectfully.	
2	of course! everyone was very inclusive.	
3	every one was involved in this class	
4	With the UN simulation being so prevalent in this class there was especially no question of defeating or disrespecting diversity.	
5	There was no limitation in terms of diversity.	
6	Many diverse ideas and experiences were respected and discussed.	
7	It was sometimes chaotic but I feel that it was pretty respectful	
8	Everyone played a part in the class

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	62.50% (5 of 8)
1	The in-class discussions were the most helpful activities, as it promoted student engagement in the class and allowed us to have productive conversations.
2	The in class discussions and the out of class work that we did.
3	In class discussions.

4	I think the most effective thing was the discussions, I personally really enjoyed this format.	
5	I think the project overall was the most effective because of how much research we had done and since the class is a project format it's a lot more interesting and engaging to involve part of the TLU campus into our curriculum.	

Q3 - What other class activities could have helped you to learn the course material?		
Faculty:	William O'Brochta	
Response Rate:	50.00% (4 of 8)	
1	Nothing really	
2	Just more visual aids	
3	I think the class works great as is, maybe if we started our projects earlier on so that we have the max amount of time.	
4	I believe that there were sufficient activities.

Q5 - Please explain your answer to the previous question		
Faculty:	William O'Brochta	
Response Rate:	50.00% (4 of 8)	
1	The professor was incredibly helpful, engaging, and informative.	
2	Not only did I learn about electoral politics but I also learned how this applies to the real world.	
3	I was in unfamiliar territory so i definitely did new a lot of new material.	
4	I was able to learn a lot about electoral politics through this class. This class gave me the opportunity to become more engaged in the electoral process.	

Q7 - Please explain your answer to the previous question														
Faculty:		William O'Brochta												
Response Rate:		62.50% (5 of 8)												
1	yes, he was very open to talk whenever and gave me lots of help and good useful information.													
2	The professor was always open and friendly to us and seemed enthusiastic to help us out.													
3	Professor was very open to having discussions in class. Also worked with us to make sure we understood the material and task.													
4	Dr. O'Brochta was a very approachable professor, I never felt like I couldn't approach this professor.													
5	Dr. O'Brochta is one of the best professors I have had in my time at TLU. I cannot convey how lucky we are to have him at this institution. I have learned more in his classes than in any other POLS class I have taken. He challenges students to see beyond the curriculum and see how it applies to their everyday life. His work is difficult but in a way that pushes you to try harder and actually apply the things that you are learning. We could use more professors like him at TLU. He is always available for support and genuinely wants students to succeed. I am grateful for Dr. O'Brochta's guidance and mentorship.

Faculty:	William O'Brochta
Response Rate:	50.00% (4 of 8)
1	Yes, there was a fair workload but it was helpful in teaching us how to manage our time.
2	There was a good amount of assignments and the grading structure made it a little difficult. It took a lot of self motivation to get an A.
3	The course material was new however, I did not find it too challenging.
4	Just because it was new to me

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	83.33% (10 of 12)
1	class discussion
2	The group projects helped me a lot to learn a different viewpoint from my peers.

3	Reading responses	
4	Performances	
5	In-class discussions helped me to understand the material better than when I just have lectures.	
6	In-class discussions.	
7	I would say discussing it as a class.	
8	I think the homework assignments where the most effective because the readings we did were usually about important topics and i felt like i learned a lot through the readings	
9	I liked the different activities that we did in class. It helped me understand more about the freshman experience.	
10	I enjoyed the in class discussions. Most in class activities were very helpful, discussions, simulations, etc	

Q3 - What other class activities could have helped you to learn the course material?		
Faculty: William O'Brochta		
Response Rate: 75.00% (9 of 12)		
1	na	
2	The little activities we did in class helped a lot with class engagement and felt very productive of the time.	
3	More performances	
4	Maybe if we did more group work.	
5	I think the class discussions were good too	
6	I think this was affective.	
7	I cannot envision any other activities, I don't really have the mind of a professor	
8	Honestly, in this class everything was taught very well and helped me a lot. This class helped me with my confidence and being able to understand things better.	
9	Group projects could have helped me more.

Q9 - Please explain your answer to the previous question		
Faculty: William O'Brochta		
Response Rate: 50.00% (6 of 12)		
1	all the work is pretty easy	
2	It wasn't super difficult but the work was very useful to help with the freshman experience.	
3	I think the work was fairly easy	
4	I do not think the work was too demanding, I did not keep up very well, but that is not due to the difficulty of the work	
5	Everything was on Brightspace	
6	A good amount of the writing was challenging.

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	81.82% (9 of 11)
1	the group project
2	n/a
3	Writing papers/essays

4	The in-class discussions were the most effective for me because we were able to express ourselves.	
5	The annotations for the reading and the lectures.	
6	I think the in class discussion and lecture helped me understand the most.	
7	I believe that the most effective for lewrning this course was the in class assignments and discussions	
8	I am very scared of group projects, but for this class it was kind of a lifesaver. I had no idea what was going on most of the time, so having people to ask questions was helpful	
9	Group work was the most effective	

Q3 - What other class activities could have helped you to learn the course material?	
Faculty:	William O'Brochta
Response Rate:	72.73% (8 of 11)

1	n/a	
2	Satisfied with learning materials.	
3	None, everything was good and well explained!	
4	None that I can think of.	
5	N/A	
6	I'm not sure	
7	I think that everything was very clear and if in doubt, go to office hours or the syllabus was very detailed.	
8	I cannot think of anything specific.

Q4 I learned a lot about the subject in this course.	2	8	1	0	0	11	4.1	4	4	.51

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

Q5 - Please explain your answer to the previous question	
Faculty:	William O'Brochta

Response Rate: 72.73% (8 of 11)	
1	n/a
2	I would agree that I learned a lot.
3	I learned about politics without there being an ongoing argument between classmates.
4	I learned a lot about governmental systems and vocabulary I did not know.
5	I know more now than I did a few months ago. I greatly appreciate the effort put in by the professor and classmates. Unfortunately I feel lobotomized most of the time, so I don't pick up on as much as I would like to.
6	I just learned alot about how the government works
7	I found this course a lot more interesting than I thought I would.
8	I believe that I have learned a lot from taking this class but have not got all the material that I should have

Q7 - Please explain your answer to the previous question	
Faculty:	William O'Brochta
Response Rate: 72.73% (8 of 11)	
1	yes he was very helpful
2	n/a
3	Very accommodating with office hours and even had a zoom meeting since I have a baby at home!
4	I think the professor encouraged us to seek help/office hours when needed. It never felt like he was annoyed by students and possibly silly questions, or put down anyone for asking those silly genuine questions
5	He was very approachable and friendly.
6	He was very easy to contact and his office hours were always available.
7	He has been available evey single time I went up to him

8	Dr. O'Brochta was very welcoming and forward with helping students.

Q9 - Please explain your answer to the previous question	
Faculty:	William O'Brochta
Response Rate:	72.73% (8 of 11)
1	some things were hard and other were easy 
2	n/a 
3	To me it was not super difficult but it was not easy either 
4	This was my most difficult class this semester. I think that maybe the reason I was always so confused, no matter how many notes I took and how hard I listened, was because I didn't expect myself to get it. In a way, I think I set myself up. I didn't think I would ever understand, so that's what happened. Manifestation or whatnot 
5	The work wasn't, but there was a lot of work that lost my attention or seemed to be overly complicated at some points. 
6	The course really made you think and do work, this isn't a course you can just sit in and not do anything. 
7	It took effort and work and the most difficult part was working with a group and configuring how to split work content. 
8	I found the workload to be challenging but well paced.

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	78.57% (11 of 14)
1	they helped me so much
2	online readings
3	lectures

4	in class assignments	
5	group projects, and homework	
6	The most effective way I learned in this class was the use of lectures.	
7	The in class discussions and in class assignments helped me most.	
8	Homework assignments, regular readings.	
9	Having class discussions was the most informative part of the classes.	
10	Everything selected was beneficial	
11	All of the above	

Q3 - What other class activities could have helped you to learn the course material?		
Faculty: William O'Brochta		
Response Rate: 64.29% (9 of 14)		
1	out of class assignments	
2	n/a	
3	n/a	
4	n/a.	
5	discussion in lecture was kept "fun:	
6	Tests.	
7	Nothing else really much professor is a great teacher	
8	I believe this class had a good variety of learning styles.	
9	Creating papers was also very enjoyable and rewarding.	

Q5 - Please explain your answer to the previous question		
Faculty:	William O'Brochta	
Response Rate:	78.57% (11 of 14)	
1	n/a	
2	n/a	
3	i learned a lot about how the government works	
4	he explained everything so well	
5	This course was very informational and made me interested in politics	
6	Learned how foreign trade works.	
7	I learned a lot regarding politics that strongly affects the field i hope to be in!	
8	I had zero knowledge on the topics in class at the beginning of the semester.	
9	I believe the professor did a good job at explaining topics and making them relatable to the students.	
10	From knowing nothing about politics to having some knowledge is major progress for me at least.	

11

Everything taught was related to real life

Response Rate:	57.14% (8 of 14)	
1	the work was easy if you came to class	
2	n/a	
3	n/a	
4	You don't do your work course will be hard	
5	Very difficult to do the big projects.	
6	The work was challenging due to my lack of knowledge on it. I also struggled with managing my time which this class needed. Overall the assignments were not incredibly difficult, but they required a decent amount of time to complete.	
7	The research memos were unlike anything I've ever done before.	
8	The course work was not so difficult as it was time consuming to complete, the work really made you sit down and think about your work and answers and use critical thinking skills.

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	92.31% (12 of 13)
1	in class discussions some of the lectures and the group projects.
2	Working with groups helped me understand the parts of the course I struggled with.
3	The writing was the most effective way for me to learn. I loved writing everything out and presenting it all on paper.

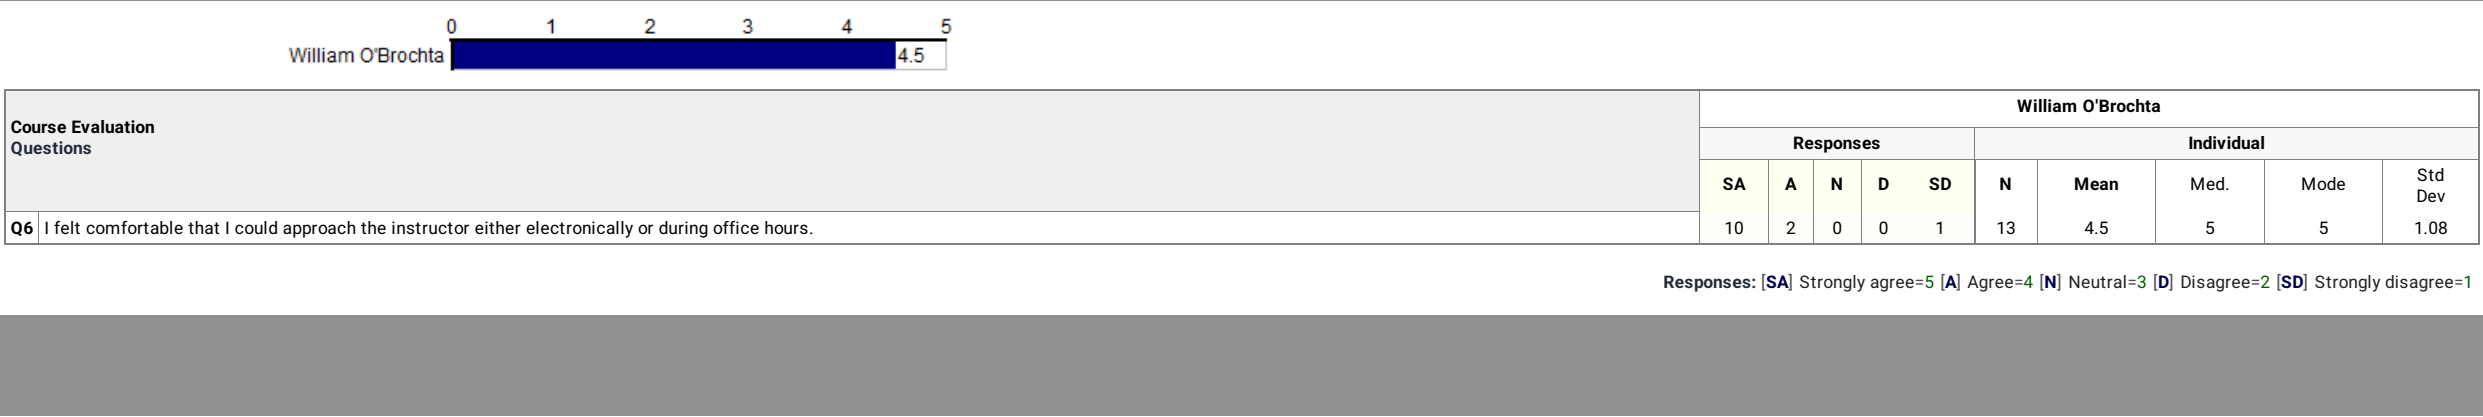

4	The most effective were class lectures	
5	The most effective for me was the PowerPoints and lectures, the readings felt like a chore more than helpful besides the R.Code example section in the readings.	
6	The most beneficial and effective form of learning during this course would be PowerPoint lectures, along with class note-taking, to fully grasp the understanding of the material.	
7	The lectures were the most helpful by far.	
8	The lecture and group activities	
9	The RCode and the writing worked best for me and were most effective. The lectures are helpful because they are accessible online when we need them.	
10	PP need to be dumbed down. Sometimes when I look back on it i find it hard to understand what was trying to be portrayed.	
11	For me the group projects and lectures were the most beneficial	
12	Being able to refer to class slides along with the homework readings we were assigned helped me learn the material.	

Q3 - What other class activities could have helped you to learn the course material?		
Faculty: William O'Brochta		
Response Rate: 69.23% (9 of 13)		
1	actually going thru what each code is in R studio. quite hard to learn if have never used the program before. teaching the code instead of just giving assignments to code.	
2	We need more time in class to absorb all the information presented during each session. I guess I am saying that students who take longer to process or absorb information can benefit from having a little extra time before being told to quickly transition to the next topic.	
3	The research paper illustrated to me the whole use of material in this class, even in doubt this was one of my hardest classes.	
4	More time dedicated to R coding and less on qualitative project unless more effort and funding are supplied by TLU for the qualitative research.	
5	More breaking down of articles and seeing research done in class so we can talk it through face to face	
6	I think the class activities that helped me learn the most were 237 quant methods and the integrated slight coding lessons to assist with this class.	
7	I think more group work on the projects would be beneficial, since most research is not one person but multiple people working together.	
8	I really liked the in class activity especially when practicing R. it was nice being able to work with the professor when I had questions. (which I had a lot of).	
9	Giving us more time to do examples and have you help us find out if we did it right	

Q5 - Please explain your answer to the previous question	
Faculty:	William O'Brochta
Response Rate:	84.62% (11 of 13)
1	it was alot in this course for just one semester especially dealing with R studio (r code). from what I heard from other students that there should be course you should take before taking this course. like statistics.
2	This class was super duper informative!! It was hard but so worth it. I feel like I can actually do my own independent research design with the information I learned in this class.
3	Research is hard but I really learned how to find a and combine ideas into a singular unit.
4	Literally had no idea what I was doing in the beginning, but now I can say that this course has taught me A LOT about things I had no idea about.
5	I was very behind so this was not on the professor
6	I think the subject of this class was learning to analyze and create data, but I also learned and understood the subject we created within the class itself for our research article.
7	I learned quite a bit about a lot of varied topics. I especially liked learning a bit of coding for my resume.
8	I learned a new skill - using the program R. I also feel like I learned a lot having to create a research question and then testing it and writing a research article about it. I feel like I have gained lots of knowledge in this course.
9	I learned some things about data analysis, but I do not think learning R code was beneficial. I know computer science majors who use it and need to know how because of their major, but it was a struggle to teach myself certain aspects of this course to complete an assignment. It took a lot of extra time on my part to produce the product required to pass the course.
10	I found out how to learn coding, as well as how to conduct research analysis
11	I can safely say that I know how to code, which will be added to my resume.

Q7 - Please explain your answer to the previous question											
Faculty:		William O'Brochta									
Response Rate:		76.92% (10 of 13)									
1	yes always have felt comfortable to do so and never had an issue to try and meet with the professor.										
2	emails It was rare to get them back in a timely manner such as 24hrs sometimes I wouldn't get response back until 3 or days later. or not at all. his hours was short time frame, definitely hard to get in. especially for students that work, and are parents.										
3	I made several appointments throughout the semester to seek help on assignments.										
4	I had initial worries but when I opened up I realized it really wasn't that bad										
5	I could always reach out and enter the professor's office hours whenever I needed assistance for anything										
6	Dr. O'brochta was amazing and very helpful. Everytime I needed help he was always there to help and even opened office hours for me anytime I needed help										
7	Dr. O'Brochta is always welcoming and while he is always super busy, he makes time to meet with students.										
8	Convenient for me because of my packed schedule on T/TR										
9	Absolutely! Office hours were made available to the body of students in class and outside of class, that way if we wanted to we could set up meetings with our professor.										
10	1000% AGREE! Dr. O'Brochta is the MOST approachable professor on campus. If I ever needed anything or any help from him he would almost always let me into his office. I have probably stopped by his office around 50 times this semester and 99% of the time he let me talk with him. He is by far my favorite professor that I have ever had.

Q9 - Please explain your answer to the previous question

Faculty: William O'Brochta

Response Rate: 84.62% (11 of 13)

1	Yes, because I had no idea how I would make it through this semester. I would highly suggest some pre-recs such as stats and a computer science class for coding.	
2	This was the hardest class I have ever taken so far in my college career. However, I learned a lot and created new tools to utilize in my career later on.	
3	The work was very challenging but very doable	
4	Since it is the senior capstone, it did require more time and energy but I was able to accomplish what I needed in a timely manner	
5	R coding was brand new to me so that was difficult, but the research design and results portions of the project were probably the hardest thing I have had to do at TLU.	
6	R coding is definitely the main reason. the professor didn't go into detail about how to run the r studio. He did just enough to run the data his way but when you would get errors. when the program and your data had errors there was no help what so ever. Also, I felt like there was a strong help towards other students than an all around. I know I wasn't the only student that felt this way. The load of work wasn't realistic for a nontraditional student. I saw it a few times especially when I asked him if he could help me on the Rcode. He would say I need the data which I had the same data as the other student but when she needed help she got all the help she needed and more. I think it should be fair.	
7	Not easy but if effort is given you can make it	
8	Learning to use R was not easy, nor was formulating my own research question and article.	
9	Its capstone. We had to do math and code, which is definitely outside our comfort zone	
10	It is very difficult. Dr. O'Brochta expects a lot but it's worth it. Often assignments are a week or 2 weeks apart but the assignments are huge. This is a very challenging course.	

11

I found certain aspects of this course challenging because it was too far out of my usual lane.

	Responses					Individual					
	SA	A	N	D	SD	N	Mean	Med.	Mode	Std Dev	
Q10	I was given clear and helpful feedback about my performance in the course in an appropriate amount of time to improve my performance in the course.	11	1	1	0	0	13	4.8	5	5	.58

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

Q11 - Please explain your answer to the previous question

Faculty: William O'Brochta

Response Rate: 76.92% (10 of 13)

1

for annotations and the research article he did. But r coding no I was in the deep end.

2

Yes. Dr. O'brochta gave lengthy feedback on each assignments and during office hour conversations. Almost always less than a week after an assignment was turned in. (most in 1 - 3 days).

3

Yes, this was very useful and feedback was given appropriately and timely to make revisions to help improve my performance in the course.

4

Very helpful and detailed comments were given on every assignment in brightspace, which helped me improve every time.

5

The rubric on brightspace after each portion of our research paper was constructive feedback.

6

I received very detailed explanations on my work and it helped me

7

I really liked the feedback I received on the assignments regardless of the effort given to it. It really improved my writing.

8

Feedback was quick and helpful, directly giving advice and direction for each mistake.

9

Every assignment was graded promptly and with informative feedback.

10

Anything that I had error in I was given sufficient feedback as well as ways on how to correct and amend my mistakes

Q12	I felt that student diversity was recognized and respected in this class.	8	2	2	1	0	13	4.3	5	5	.99

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

Q13 - Please explain your answer to the previous question		
Faculty:	William O'Brochta	
Response Rate:	61.54% (8 of 13)	
1	Yeah! I think it was recognized very well.	
2	There was no issues with lack there of and everyone seemed to be treated equally.	
3	The people with accommodations are at a disadvantage.	
4	The class was very welcoming and easy to talk to dr. o'brochta and students	
5	One of our key projects relied on how diverse and spread out our student population was, and relied on the differences we each had to conduct our research.	
6	I mean if a professor is racist then there is a issue but Obrochta is not. Very good guy and I really do not see the purpose of the inclusion of this question every year. I would like to think the university would recognize when this is an issue.	
7	Diversity of approach and diversity of ideas/culture were recognized and respected in this class.	
8	AGREED!

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	100.00% (5 of 5)
1	discussions! they were super funzies and i loved doing the observation aspect of these discussions
2	The reading was most helpful combined with lectures.

3	The in class discussions were the most helpful and I was able to not just learn from the professors but also my fellow classmates.	
4	I think the most effective item was the online reading assignments that we had for the class with the annotations. We explored a lot of interesting concepts and I think it was really nice that we were able to talk with others while doing the reading and see their idea. This paired with the group discussions of the readings was really nice since we also got to go in depth on certain ideas that we were interested in.	
5	Group discussions	

Q3 - What other class activities could have helped you to learn the course material?		
Faculty:	William O'Brochta	
Response Rate:	100.00% (5 of 5)	
1	i think this class had enough activities, and all were pretty effective	
2	We had one big group project that we worked on to help improve the school stainable and I was able to learn a lot not only our school but ways that we can improve the environment.	
3	There's nothing really that I can think of, the way that Dr.O'Brochta handled this course and went about teaching it was perfect. The readings were wonderful and getting the chance to work on a large scale project like the AASHE Stars report was a really interesting concept and I'm glad that I got to experience it.	
4	More direct lecturing.	
5	Lectures

Q5 - Please explain your answer to the previous question		
Faculty:	William O'Brochta	
Response Rate:	100.00% (5 of 5)	
1	i want to be like omg, we never even talked about politics because it didn't feel like we did to be honest, but like almost all your classes its like random knowledge appears in my brain	
2	There was a lot of material that I had never seen before and it updated me a lot on the current situation of the climate in our world and how peoples responding to it. It also helped me dissect what sustainability is and how that plays into our campus and the world around us.	
3	I learned quite a lot about the environment and the political implications of many environmental topics.	
4	I didn't know anything going into this class but I was able to learn so much within this semester especially for not being a political science major.	
5	All the information was new to me but was still easy to comprehend with some background knowledge

Q7 - Please explain your answer to the previous question															
Faculty:		William O'Brochta													
Response Rate:		80.00% (4 of 5)													
1	yes! you make us all feel very welcome do not fret														
2	He is super welcoming and helpful with everything. When you don't understand something he is more than willing to go the extra mile if you put in the effort yourself.														
3	He is always available.														
4	Going to office hours has been one of the most helpful parts of the class whenever i have questions. As someone who's not a political science major, Dr.O'Brochta is very helpful in explaining things and dumbing it down if need be. Along with this he is very responsive to his email and is able to communicate efficiently if you have any questions or concerns.

Q8	I found the work in this course to be challenging.					0	4	1	0	0	5	3.8	4	4	.40

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

Q9 - Please explain your answer to the previous question															
Faculty:		William O'Brochta													
Response Rate:		100.00% (5 of 5)													
1	The work at times would be simple but there were also others that really challenged thinking and applying what we did.														
2	Some topics can be challenging to those not in Politics/Comm but still interesting the way it was taught.														
3	It's not my major and it's a level 300 class, so even though the work was a little difficult I managed to get through it and I learned a lot from it. I think the difficulty of the course was a good kind of difficult so I would definitely consider taking courses like this in the future, especially with Dr.O'Brochta.														

4	I wouldn't say its hard, but it was definitely a lot of work, especially for those who have not had your class.	
5	I found the time log challenging because I procrastinate at times.

Q11 - Please explain your answer to the previous question															
Faculty:		William O'Brochta													
Response Rate:		100.00% (5 of 5)													
1	yes, feedback was always very timely and quick														
2	The feedback I was given really did help me not only improve in this class but in the others as well to help with my study habits.														
3	Dr.O'Brochta will add comments to almost all our submitted work on Brightspace and respond to our comments on the reading. This way we understand his critiques and he explores parts of our reading that we hadn't thought of before.														
4	Appropriate feedback given consistently														
5	Always gave a good amount of feedback and even asked questions that could be thought of for future assignments.

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	90.48% (19 of 21)
1	the in class activities
2	Work with partners.
3	The most effective were working with others it helped understand more frequently.

4	The in-class discussions were the most effective for me because I feel I learn better face-to-face and overall im more engages in the discussions when its in class.	
5	The homework and in class assignments were very effective	
6	The class discussions.	
7	Lectures were the best	
8	In- class discussions	
9	In class discussions	
10	In class discussions.	
11	In class discussions	
12	In class discussions	
13	In class assignments	
14	I'd say it was the group activities, it helped me engage with my peers more and see what we each were capable of when it came to group activities.	
15	I would say the in-class discussions. I work well with in person discussion to understand and getting different material done.	
16	I would say my writing homework assignments, especially because it forced me to understand how what we learned in class affected me.	
17	I would say both	
18	Group projects and in-class discussions were most effective for me when learning the course material.	
19	Group activities	

Q3 - What other class activities could have helped you to learn the course material?		
Faculty: William O'Brochta		
Response Rate: 85.71% (18 of 21)		
1	nothing this did everything for me	
2	n/a	
3	idk	
4	Nothing	

5	Nothing, I think Dr. William O' Broachta did an excellent job and make everything simple and understandable.	
6	Nothing much we did alot of activities that really helped in this coruse.	
7	Not much	
8	NA	
9	N/A	
10	N/A	
11	N/A	
12	Mostly just lectures	
13	Lectures	
14	It would be the ice breakers, it helped me know my peers more and it was easier to work with them.	
15	I wouldn't say anything really would help more, I believe I know the course material decently.	
16	I mean this class was very fun and I was able to pay attention well.	
17	I have no clue	
18	Going more in depth on the readings and having less due to let us fully grasp what it is we're reading

Q4 I learned a lot about the subject in this course.	10	10	1	0	0	21	4.4	4	4,5	.58

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

Q5 - Please explain your answer to the previous question	
Faculty:	William O'Brochta
Response Rate:	85.71% (18 of 21)
1	no
2	Yes, I learned a lot in this class, it helped me working with others and how to get involved with my peers and on campus.

3	It was a really straightforward course, and most of the content was already known by me.	
4	I missed alot of class but still managed to keep up	
5	I learned how to be more comfortable with working with others.	
6	I learned a lot of new things during class and outside of class while doing activities.	
7	I learned the meaning of vocation and how to read critically	
8	I learned how to be comfortable in the uncomfortable.	
9	I learned how to navigate the My TLU portal, and I learned how to be more out there.	
10	I learned about vocation, and study skills	
11	I learned how to write correctly	
12	I leaned a lot about being a bull dog	
13	I know way too much about vocation now	
14	I know about vocation	
15	I can agree that I learned a lot in this class not just by the material given but how he explained and how he had us do things.	
16	I believe I learned a lot about this subject because I've been able to more easily apply things like critical thinking, meaningful annotations, and argumentative points towards my other writing classes.	
17	He explained things very good	
18	Discussing the material helped further my knowledge

1	i did it multiple times	
2	he is very welcoming	
3	The professor was always great to talk to and didn't make me feel uncomfortable	
4	Professor O'Brochta is a very approachable person and at no point did I feel like he'd refuse or be unhelpful during interactions.	
5	Just the switch from high school to college is still settling in im not used to office hours nothing against the professor	
6	I've met up with my professor once, and it helped me out a lot with my problems and we were able to find a solution to it.	
7	I was in office hours almost every week.	
8	I trust that Dr.O'Brochta has my best interest in mind and can help me in any situation.	
9	I go visit Dr. O'Brochta more than any professor	
10	I am very comfortable with my instructor. He is very easy to talk to and very helpful.	
11	He's very easy to talk to and he is very understanding	
12	He was very helpful	
13	He makes him self available for you	
14	Dr.O'Brocta was a professor who was easy to talk to and someone I knew who would help and respond if I needed help with something.	
15	Dr. O'brochta is a very welcoming professor and very kind.

Q9 - Please explain your answer to the previous question	
Faculty:	William O'Brochta
Response Rate:	71.43% (15 of 21)
1	very simple assignments and aslong as you did them you got the grade

2	no	
3	You have to put l. Effort	
4	This class is meant to improve critical reading and what it means to be a TLU Bulldog for first year students.	
5	The work was very easy which I enjoyed a lot especially as this is a first semester of college. The work is easy and only requires that you provide meaningful and worthwhile responses to the prompts.	
6	The work itself was easy to do, all the readings were easy and simple, the activities were simple and helped me out a lot with my peers.	
7	Nothing is hard, it's just actually starting the assignments	
8	It was more of reading work	
9	I was able to complete the work without too much of a hassle	
10	I honestly just completed the work, I didn't really find it hard. Sometimes it just required to think a little more.	
11	I found it easy becuae I did annotations in high school, and I liked all the activities we did.	
12	I dont think it was challenging i just made it hard on myself	
13	At some times it could have been challenging but he made it as simple as possible to get through it.	
14	Again, this is a very straightforward course.	
15	A lot of readings due almost every time we had class about different topics

Q11 - Please explain your answer to the previous question	
Faculty:	William O'Brochta
Response Rate:	66.67% (14 of 21)
1	told me how I did
2	no

3	Yes he gave me good feedback and things i need to work on	
4	We had check ups with our peer mentor	
5	There were always comments and responses to our assignments the same day they were submitted, or very shortly after.	
6	My mentor was always there	
7	My instructor always provides good feedback when he grades our assignments.	
8	If I ever email or asked about my homework, Professor O'Brochta was quick to respond and clear up my confusion.	
9	He emails you when you need it to make sure your the best you can be	
10	Every time I finished an assignment and got feedback, the feedback would be very detailed and where I could see he cares for each student.	
11	Dr.O'Brochta made sure to leave comments on our work.	
12	Dr. O'Brochta gives me feedback on most of my assignments and they're both funny and helpful.	
13	Dr. O'Brochta has been helping me keep up with my assignments and good time managing skills	
14	Always explained what to do

Q13 - Please explain your answer to the previous question	
Faculty: William O'Brochta	
Response Rate: 61.90% (13 of 21)	
1	perchance 
2	n/a 
3	Yes! He is a very understanding person. 

4	We went over it but just that	
5	Like with my other professor, I don't really notice diversity but he treats everyone equally and fairly, he holds people accountable if they decide to not do the assignments or when it comes to important projects.	
6	I feel like no one ever had a problem with it in our class	
7	I feel like our class was just one big friend group of course we all had our small cliques but when we had in class activities and had partners we paired well with anyone	
8	Everyone was invited to present their own opinions and life experience insights, during social annotation assignments and class discussions.	
9	Everyone was welcomed and cared about equally	
10	Everyone was included and no one felt left out	
11	Every student was treated fairly	
12	Dr. O'Brochta is really good at making everyone heard	
13	At no point did I feel like one student was preferred over the other, we were all treated equally.

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	92.31% (12 of 13)
1	cool classgood
2	Simulation exercises
3	In class discussions.

4	In class discussions.	
5	I'm class discussion	
6	I think the in-class discussions were the most effective because they helped me understand the course work.	
7	I feel all these benefited me, and I learned in each of these different learning courses. I think the most effective one, personally, was the congress simulation. I didn't know how it worked, and this helped me gain a better understanding.	
8	I believe it was the homeworks, which also are the online exercises. The Perusal activities where interesting because it helped me engage with the reading and learning things I had no idea about.	
9	Group projescts , powerpoints	
10	For me, the most effective was doing community work and also group work.	
11	Doing activities. Sitting around in a class with only lectures is a nightmare and I tend to get distracted but here we had activities where we had to walk around or actually do something so it was fun and definitely helped me out a lot.	
12	Class discussions were always helpful when learning new material and talking about the rubrics.	

Q3 - What other class activities could have helped you to learn the course material?		
Faculty: William O'Brochta		
Response Rate: 92.31% (12 of 13)		
1	none	
2	idk a lot	
3	PowerPoints help me a lot.	
4	Not sure, I am more of a hands on learner.. lecture after lecture drives me insane.	
5	N/A	
6	N/A	
7	I think what activities was provided to teach us was perfect to help me learn.	
8	I think that what we had was good enough for me.	
9	I personally think all the stuff we did helped me as much as it can	
10	Honestly none, I think the course works perfectly, however, I would've given at least a week more to work on the group project, since it was a little difficult for people who aren't really in the political science major.	
11	Group projects.	

12

Group projects also helped me, bouncing off ideas and understanding they way others think helped me shape my own ideas.

Faculty: William O'Brochta	
Response Rate: 92.31% (12 of 13)	
1	ye i learned a lot
2	We learned different things in this class. Each thing we learned there was quality time spent explaining and helping us understand.
3	We had several activities that helped me out.
4	It was good; I learned a lot.
5	I'm not all about politics, it was unentertaining.
6	I think I learned enough of the things I had no idea how they worked.
7	I strongly agree. I learned alot about American politics and learned alot of stuff I never knew
8	I loved that we were able to do group work and also and in class discussions.
9	I learned a lot about politics and how the public works with it
10	I know about American politics than I did before and the research memo really helped me expand my knowledge of writing a research memo paper.
11	I have thought a lot in the course and was involved with the discussion.
12	I feel like i have knowledge about the coursework

Q7 - Please explain your answer to the previous question		
Faculty:	William O'Brochta	
Response Rate:	84.62% (11 of 13)	
1	ya cool professor	
2	Yes, I visited a couple of times and felt very comfortable coming up to him with questions or help.	
3	Very understanding and willing to find ways to figure something out.	
4	Very personable with students.	
5	The professor was very helpful in making sure if we had any questions or problems to help us come up with a solution.	
6	N/A	
7	I went to his office several times of the course of this semester with and without an appointment, he always made time to answer questions I had at least to some degree.	
8	I could go in at any time.	
9	I can clearly communicate with the professor and met with them.	
10	He would even encourage us to go see him at his office if we had any questions or we needed help with both our projects or research memos

Q10	I was given clear and helpful feedback about my performance in the course in an appropriate amount of time to improve my performance in the course.	9	4	0	0	0	13	4.7	5	5	.46

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

Q11 - Please explain your answer to the previous question

Faculty: William O'Brochta		
Response Rate: 61.54% (8 of 13)		
1	ofc	
2	The rubrics on papers helps me figure out what I need to fix.	
3	It was made extremely clear what i can do to improve	
4	I was given feedback in a lot of work and was able to improve upon it.	
5	I was given instructions on ways in which I could increase my grade.	
6	I liked the reactions and replies in the Perusal activities.	
7	Always gave strong feedback in bright space.	
8	All of my work was graded very quickly, which gave me time to fix whatever I needed to. He is quicker than all my other professors with grading	

Q13 - Please explain your answer to the previous question		
Faculty: William O'Brochta		
Response Rate: 53.85% (7 of 13)		
1	ye	Q
2	none.	Q
3	No discrimination was in this class.	Q
4	Lot of diversity	Q
5	I have extended time on assignments, and I feel like some of the assignments (Perusall Annotations) could have been opened up for student like me.	Q
6	I feel like we were all respected	Q
7	I don't think there was chance for it to happen.	Q

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	81.82% (9 of 11)
1	the in class writing
2	group projects and lecture

3	The presentations we would look at	Q
4	Probably the discussion post readings because it gave good insight as to what was going ot be talked about the next day.	Q
5	Lectures because Dr O Brochta did a great job explaining things to us in a way we'd understand.	Q
6	In-class discussions	Q
7	I think the class discussions helped me the most, as well as the in class writings.	Q
8	I really enjoy his yapping in class, I feel like I learn extra random things that I get to tell my friends about.	Q
9	I like in person lectures. Its the best way I can learn.	Q

Q3 - What other class activities could have helped you to learn the course material?		
Faculty:	William O'Brochta	
Response Rate:	81.82% (9 of 11)	
1	the group projects	Q
2	nothing	Q
3	Tests :(	Q
4	Nothing	Q
5	Nothing, what Dr. O'Brochta already had for us help me understand what we were talking about	Q
6	Maybe if we had chapters of a book we had to read each night.	Q
7	I think the variety of activities was great.	Q
8	Group projects	Q
9	Doing class projects with groups. Working with other people in the class makes me have a broader mind into what other peoples opinions are.	Q

Q8	I found the work in this course to be challenging.	1	7	2	1	0	11	3.7	4	4	.75

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

Q9 - Please explain your answer to the previous question		
Faculty:	William O'Brochta	
Response Rate:	72.73% (8 of 11)	
1	it was just a lot to it	
2	it was challenging as some points and others wasnt so much	
3	There has been a handful of challenging assignments	
4	The essays were a bit challenging, but like anything else, if I had any questions, I made sure to go to office hours.	
5	The annotations were a bit difficult to do along with the memo, but we still got it done and was able to get either a good grade or would give us feedback on mistakes so we can see our mistakes and how we can fix it	
6	I found the Research Memo to be a bit complicated to follow, I think doing more work on that in class would help prevent confusion.	
7	History and information in general is not my strong suit.	
8	Everything was extremely straight forward the only thing I kind of struggled with was the annotations.

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	71.43% (10 of 14)
1	great class
2	The use of powerpoint presentations
3	The literature reviews and theory were very helpful to understanding my research question.

4	Lecture.	Q
5	I'm an observant so i learn by watching and actually doing.	Q
6	I would say lecture would be the most effective for learning for me	Q
7	I think the lectures and the homework assignments helped me best to learn throughout this class.	Q
8	I believe the most important aspect which was most helpful was the lectures which included explaining / answering questions on the board. The group project was also helpful in learning important aspects of the class.	Q
9	Field work	Q
10	Definitely the most helpful were the lectures.	Q

Q3 - What other class activities could have helped you to learn the course material?		
Faculty: William O'Brochta		
Response Rate:	50.00% (7 of 14)	
1	online videos helped me with the R homework	Q
2	amzing course work	Q
3	The in-class discussions and PowerPoints we had in class were also very beneficial for me.	Q
4	N/A	Q
5	Mandatory one-on-one time.	Q
6	IDK	Q
7	Hands on with the R code.	Q

Q5 - Please explain your answer to the previous question	
Faculty:	William O'Brochta

Response Rate: 50.00% (7 of 14)	
1	learned alot .
2	Too much information.
3	The material was efficient in helping me understand concepts that supplemented my capstone and learning aspects of both R and research methods better helped me prepare for my future career. Especially since the majority of my work load will be data analysis.
4	IDK
5	I learned how to properly write a research article and model and form a study.
6	I learned how to properly write a political science research paper
7	.

Q7 - Please explain your answer to the previous question	
Faculty: William O'Brochta	
Response Rate: 64.29% (9 of 14)	
1	he was busy .
2	Yes even with random stuff
3	The instructor was extremely welcoming with office hours and was always responsive with questions in person and email.
4	Schedule was difficult to maneuver around but was always there when I needed help.
5	IDK
6	I was able to attend office hours, email or just pop into his office with questions
7	I did.
8	Dr. O'brochta was extremely welcoming and always reminded us to come to his office ours and was even willing to talk to us when it was not his office hours.

9

Dr. O'Brochta and I communicate almost on a day-to-day basis outside of class but whenever I was curious or needed help, he was very attentive as he usually is in regards to things in and outside of class.

Q8	I found the work in this course to be challenging.	8	4	2	0	0	14	4.4	5	5	.73

Responses: [SA] Strongly agree=5 [A] Agree=4 [N] Neutral=3 [D] Disagree=2 [SD] Strongly disagree=1

Q9 - Please explain your answer to the previous question

Faculty:

William O'Brochta

Response Rate:

64.29%

(9 of 14)

1	very hard to much writing	
2	Too challenging.	
3	The work load was slightly above average but not too difficult which was helpful in learning time management.	
4	R was definitely challenging and understanding the process to create a true data analysis, but I found it to be crucial information to retain.	
5	R is hard	
6	Only when you don't pay attention in class	
7	I mean **** there was sumn due every week. * Inappropriate words were found and removed from this response.	
8	I feel that it was very tedious and hard work but in a good way. It was a challenge that I enjoyed to do.	
9	Doing a research article from scratch was quite difficult..

Q2 - For the items chosen above, which were most effective for you in learning the course material?	
Faculty:	William O'Brochta
Response Rate:	81.82% (9 of 11)
1	in class assignments
2	The simulations were really helpful

3	Simulation was the most fun.	
4	Simulation exercises, in-class discussions	
5	Lectures and in class discussions	
6	In class Disscusions	
7	I think some of the most beneficial things that we did in this class for me was the lectures. I think the lectures were beneficial because I feel like if I were to miss one I would have been really confused. I feel like in this class if you want to learn you have to come to class.	
8	Group project and homework assignment	
9	For me I would say the in class discussion and lectures as I felt like they were beneficial.	

Q3 - What other class activities could have helped you to learn the course material?		
Faculty:		William O'Brochta
Response Rate:		72.73% (8 of 11)
1	n/a	
2	more lectures, less annotations.	
3	idk	
4	N/A	
5	More group projects	
6	Maybe in class assignments so we can ask you help before we leave class	
7	I feel like another activitie we did in class to help me learn about what was going on was the in-class dicussions. I feel like I was able to express my thoughts and communicate what was going on.	
8	Everything was there for us and didn't really need more

Q2 - For the items chosen above, which were most effective for you in learning the course material?

Faculty:	William O'Brochta
-----------------	--------------------------

Response Rate: 89.47% (17 of 19)

1	small group work/ photovoice	
2	in class assignments and discussions	
3	This course took me outside of my box.	

4	The most effective items in this course in learning was probably the in class activities.	Q
5	The in class discussions have been the most effective for me.	Q
6	Reading and discussion time.	Q
7	Performances	Q
8	Lectures. This subject was harder for me than I thought it would be, and having Dr. O'Brochta explain everything and tie it into things I understand is really helpful.	Q
9	In-class discussion	Q
10	In-class discussions	Q
11	In class assignments	Q
12	I would say that the in-class discussions was most effective. It was really useful to bne able to discuss with our peers and view their perspective on what we're talking about in class.	Q
13	I would say group projects were effective. It helped me learn with my peers and still being able to adjust to the lecture.	Q
14	Group Projects	Q
15	For me, the most effective were the group discussions because I get to see everyones side and different perspectives.	Q
16	Doing the activities during class was what helped me most. It was the most fun way to learn and also helped do something just beyond reading.	Q
17	Case assessments were very interesting, appealing, and fun to do and create	Q

Q3 - What other class activities could have helped you to learn the course material?		
Faculty:	William O'Brochta	
Response Rate:	78.95% (15 of 19)	
1	na	Q
2	n/a	Q
3	lecture.	Q
4	The photovoice was a nice change to an artistic and journalistic approach	Q
5	Slideshows. Im a visual learner.	Q
6	Nothing. Every thing he has really helped.	Q

8	I was not expecting this course to be about immigration process, I thought it would be more about public admin. But have learned a lot.	Q
9	I understood some but not all. There was a lot of big words that I didn't even know existed.	Q
10	I strongly agree because I feel I can leave this class feeling confident in discussing Public administration.	Q
11	I learned a lot about immigrant policy and bureaucrats that I didn't know/was confused about before.	Q
12	I learned a lot about public administration and how to understand the processes of public policy.	Q
13	I learned a lot about everything because the readings were inclusive and had a lot of different perspectives on subjects.	Q
14	I did not have much understanding of this topic so I pretty much started from scratch.	Q
15	I believe that I did learn about public administration within immigration, but not overall.	Q
16	Everything was explained in detail to me.	Q

Faculty:		William O'Brochta
Response Rate:		78.95% (15 of 19)
1	yes, always	
2	yes always available	
3	i did.	
4	he is always avaialable	
5	We all love Professor O'Brochta. He is amazing and so friendly.	
6	Professor was very accessible.	

7	The readings were pretty difficult to comprehend. Discussions in class through the professor and other students helped me catch onto the ideas.	Q
8	The photovoice was the hardest.	Q
9	Some of the assignments were unique and challenging. I had a bit of trouble with the Photo Voice project.	Q
10	Some of the assignments were not clearly explained which made them a little challenging. My school and work schedule also made it difficult.	Q
11	Not that hard	Q
12	It was more challenging than I thought	Q
13	It was difficult, but I enjoyed being challenged.	Q
14	I think the material was challenging but in the best way possible. It actively challenged me to think outside of my usual scope.	Q
15	I didn't think there was any	Q
16	I am a communications major which means no politic science classes, so this was difficult for me. I had a hard time understanding things when I felt like others knew much more.	Q

Louisiana Tech has an online course evaluation system that asks 10 multiple choice questions in the topics listed below. A rating of 4.0 is the highest possible rating. There is also an open text box for students to submit any comments. The multiple choice and text comments are sent to instructors at different times.

National Government in the U.S. (Spring 2023, Winter 2022-2023 x2, Fall 2023 x2, Spring 2022 x2, Winter 2021-2022 x2, Fall 2021)

Spring 2023:

Dr. O'Brochta is an amazing professor who shows interest in the subject and has concern that his students understand the course materials.

The course is pretty hard at times but the professor always tries to help students understand what is going on

This class is excellent when it is taught by Mr. O'Brochta, except for the annotations. I understand the readings being important for the class, but the annotations themselves are basically busy work. Otherwise, great class.

I really enjoyed the class and how much we interact with each other. Dr. O'Brochta also does well with student-athletes and giving me a heads up of what I am going to miss and what I am needing to do!

The best professor I have had thus far in my academic career. Dr. Obrochta is always willing to help and is very personable with his students. He is very understanding and caring to us. His office is always open. His class is well organized, and we stay on schedule without feeling overwhelmed.

Dr. O'Brochta understands that most students don't find political science interesting, not even in the slightest, but he does his best to make the class interesting. I like the combination of individual and group/partner work. He's always available during his office hours and he communicates clearly and in a timely manner.

Winter 2022-2023, Class 1:

The only complaint I have is the quality of homework. I do not like it was so difficult to do the annotations.

Amazing professor, but group work EVERY CLASS was absolutely painstaking. I was so concerned with being disgusted by group work that I rarely ever remembered the material given during those times.

Great communicator.

Dr. O is a highly engaged professor that makes political science accessible and interesting. He's excellent at giving constructive feedback in both the individual and group projects. Above all, he's respectful to his students.

requires a lot of research for a class that is not in my major. this class should not be all or nothing

At the start, I didn't really understand what was going on and I was confused but after awhile I found it getting easier because of his teaching.

Dr. O'Brochta conducted a wonderful class- the class was organized on Moodle and had the PowerPoints with the topic discussed in class. He made sure we understood the topics being discussed as well as group work to allow us to hear other peoples views and opinions. I really enjoyed the group project because the goal was to become involved with the community and let us come up with ways our university could help.

He is pretty strict, but overall a pretty great teacher.

Winter 2022-2023, Class 2:

I didn't like the class but he is the best teacher I've had a tech so far

I have no negative comments, he did a good job.

I really enjoyed the class but the problem is me not managing my time well at all.

I loved the way that you taught all of the material and made a rather boring subject in my opinion a class that I actually looked forward to coming to.

I was a bit worried about this class at first but I think it is good now.

His biggest strength is communication...

I loved Dr. O'Brochta. Many people struggle with this topic but he makes a big effort to connect with his students and offer many opportunities to ask questions and get help on assignments.

The professor was very excited in teaching the material and made the class fun. Was overall my favorite class this quarter.

I think Dr. O'Brochta is one of the best professors I have had here at Tech so far. He is always very engaged in the class and you can tell he is very passionate about what he is teaching us. You can also tell just how much he wants us to succeed not only in class but in college in general. He also has a great personality that makes class very fun.

He is very enthusiastic about all things of the course and its very genuine. He truly enjoys teaching this course and is very knowledgeable on all topics discussed. His main mission is to involve the students in discussions to get us excited and participating.

Fall 2022, Class 1:

This professor makes learning a topic that I don't like very much interesting and fun. #polsrocks

Great teacher

He was great

Great Class. Passing with happiness.

Dr. O'Brochta is a wonderful instructor. He is passionate about what he is teaching and that passion rubs off on his students and makes us eager to learn and interested in the things he has to say. I feel like if I had taken this class with any other instructor I would not have enjoyed it as much. He cares about his students and it shows.

I love the way this class is organized, but I wish the grading system was different. The current system Dr. O'Brochta uses can be a little confusing and stressful as a student who is very concerned with their grades.

LOVED THIS CLASS!! I loved the way each class period was set up, and how there was never a day that felt like it was a waste of my time. Very low stress, but also very productive. I loved taking this class and would gladly take it again!

Fall 2022, Class 2:

This professor made me get out of my comfort zone which was really helpful.

I think the only thing I would have appreciated in this course would be a better syllabus calendar that specified all due dates for the research memo/community engagement project more clearly. Dr. O'Brochta was an excellent professor especially in office hours: he was extremely helpful and generous with his time. I loved the course structure and appreciated not having traditional exams. I also very much appreciated that he sticks to his rubrics and doesn't take off points just to take off points. You could tell that he is a master of the subject and knows how to teach it at a lower level well and incite interest in it.

This was a very good class. However, it is very long. So I think it would be better if he included a longer break, like 10 minutes or so.

He is very helpful and shows he does want us to do good.

He is a great guy who clearly loves POLS, however he does not realize or at least seem to realize, that most of us want nothing to do with it after this class. Class is so long and very redundant. Again, great guy who loves pols so much, but he expects us to know or care as much as he does. The class is unrealistic

I love Dr. O'Brochta, his course is my favorite in my college career so far. His lectures are engaging and enjoyable and he is a fair minded professor who is willing to work with his students.

Professor O'Brochta's passion towards the subject he teaches is very appreciated.

I learned a lot in this political science class that I wouldn't have ever known if I hadn't taken a chance on this course. I have no complaints because I learned a lot of new material that I know will help me become a better citizen in my community.

I really liked the interactive aspects of the class and how we were always kept engaged. The lectures were always well made and easy to follow, and any questions asked were answered. Overall, I really enjoyed this class, and there isn't really anything I can think of to improve the class.

He was very nice and helped me whenever I needed. I really appreciated that.

Dr. O'Brochta is a one of a kind professor that is both passionate about the subject but truly cares that his students learn and understand the material. He makes an rarely seen effort to learn the name of every student in his class, and in our conversations, has shown real interest in my interests and wishes to help me succeed as a student and as a person.

I knew that this would be a fun and successful course when Dr. O'Brochta had learned nearly the entire classes names within the first week of school. He explains everything very well in class and makes sure to keep the class engaged doing group and partner projects in and out of class. I

have always been passionate about government but he has taught me aspects of it that I did not know before. Also, he is always available during his office hours and provides as much help as you need.

He is really great, one of the best teachers I have had so far at this university. Also has cool activities, like the Ruston City Hall, Cornerstone plaque activity, and a few other good ones.

Spring 2022, Class 1:

Thank you for being such a great professor! You made me enjoy the subject, which I did not think would be possible, and I enjoyed how you have structured the class a great deal. Thank you again, and have a good summer!

I like group work but it gets excessive when it is everyday. At least don't have two person groups, maybe three or more. Also making a groupme or other groupchat with the class would help a lot. I know I had questions and didn't know many people to ask.

I really appreciated your willingness to meet with me outside of class. The only thing that would make this class easier to accomplish would be to explain the assignments further out in advance.

Class can be sometimes be too stretched out. Group projects happen everyday, and if you are not a social person, it can cause you to not be in the best mood.

I enjoyed this class and feel I have gained a greater understanding for the subject which I knew very little about beforehand.

Spring 2022, Class 2:

Communicated very well and managed to keep me interested in a subject that I thought would be hard to get through. Is an overall excellent professor.

Some of the work was kind of pointless and time consuming.

You're doing a great job

He cares about what he teaches and does his best to make the student understand the topic and give great feedbacks.

He really cares about helping students understand the work and is very willing to help.

This class was very enjoyable. I found it very interesting and actually fun to attend.

Dr. O'Brochta is always willing to help, yet stays consistent with challenging his students to find the answer his or herself with guidance. The group work instead of quizzes/exams is challenging, however I do think that quizzes and exams would allow for more effective learning. On the other

hand political science is not the average history class, so the group work and research memo corresponds appropriately.

The way the class is taught is pretty amazing and teaches with passion.

Dr. O'Brochta is very passionate about teaching and makes politics understandable, and even more importantly, bearable. His ability to remember every students' name and frequently use them makes the class much more engaging and shows that he cares. His investment in / care of political science makes me want to learn more. Great instructor.

Winter 2021-2022, Class 1:
Great teacher and course.

I guess the only complaint would be how the annotation homework was presented. I eventually understood but it was confusing if it was due the night of or the day of.

Dr. O'Brochta is a very good at keeping the class entertaining and easier to understand. His communication skills are excellent and he seems as though he genuinely cares about the course content.

A big strength of yours is keeping a topic like politics interesting and not stressful to talk about. I was very worried about this course at the beginning and now I am actually enjoying learning about politics. It makes me want to pay more attention and try to get involved more wherever I can. I do keep up with politics in general, but the entire process makes a little more sense to me now. Thank you for teaching this class with everyone's views in minds.

This instructor was one of the most well organized that I have ever had and took much pride in teaching this material to students. He was very concerned in student's need and ensured to have an open-office policy to where students were able to come and chat to him during his office hours regarding any concerns that we had. He additionally provided a foundation to early preparation of certain techniques that assisted with foundations later down the line for other assignments in the course. He each day followed a strict schedule that he adhered to and not one time got off topic. Although this course required a variety, it wasn't as difficult if you made sure to pay attention and do all required assignments.

Dr. O'Brochta is very passionate about his job and the class. He is more than willing to help with any bit of confusion.

This is a one-in-a-million type of class. An instructor with all the necessary traits to actually accomplish something. High charisma, especially for an 8 am class. Lots of brain stimulating activity, the class doesn't really get boring. There are lots of opportunities to get to know your classmates and actually have discussions. There are some fun things mixed in every so often and it really makes a difference. The syllabus has everything you need to know, it's organized well too. He adheres to the rules that he set at the beginning of the quarter, you know exactly what you're getting into after the first class. The group project was one of the more enlightening

projects because it is set up in such a way that you realize how difficult it actually is to get things done in your community.

There is a good balance in this class and it was a good experience overall.

Dr. O'Brochta is phenomenal. I've never had a professor so transparent, rigorous, and excited to teach every single day. He has never been lousy, is kind of goofy, and is excellent at explaining the material he loves. I've never asked a question and not received an in-depth and informative/eye-opening answer. Love this guy.

I just didn't like all the group work but besides that, it was an excellent class.

Winter 2021-2022, Class 2:

He was an amazing teacher that effectively communicated with us.

Nursing student here, Thank you for meeting with me throughout the quarter and seeing that I have anxiety for one and two the past 2-3 quarters have been full in heartache and tears. Even though this has been the hardest class for my brain to handle, you have done a fantastic job explaining when I I'm not getting it the first time.

Dr. O'Brochta is an amazing teacher! He took me from disliking Political Science and being worried about not understanding the class to enjoying it and understanding it so much i actually loved being in class. So personable and so fun!!

I would have to say that the main strength, is his compassion for the material and what he teaches us. His weakness, is that he goes a little bit too fast and has lost me a bunch of times.

Great teacher and great energy overall . Really enjoyable class.

he expects too much out of students who do not want to have anything to do with political science in their career.

INCREDIBLE instructor!! So kind, thoughtful, engaging, intentional, and thorough. Wiling to answer any and every question- no matter how silly. Though this kind of class is not very interesting to me, he made it as enjoyable and fun as possible!

Very very accommodating! I hated the class- just due to me not having an interest in POLS but O'Brochta is a wonderful teacher and so so extremely sweet!! If he taught any other class I probably would switch my major, I just have zero interest in POLS LOL!

He's a nice teacher and the course is really good. His teaching style is nice. I literally have no problems with the class except for the amount of annotations. Like maybe once a week is nice. But having 2 every week is kinda much

Despite the annotations every night, I enjoyed the class and the instructor was great.

Fall 2021:

Mr. O'Brochta is one of the most informative, passionate professors I have had so far. He does an excellent job at presenting all the facts how they are and shows the class all sides of an argument. He allows every student to make decisions for themselves when thinking and talking about politics. He does not push his opinions on the class. He is a very educated professor and I am happy to have taken his class.

I did not know what to expect going into this class. Dr. O'Brochta is veryyy fast paced. I often found myself confused at the beginning of the quarter. Each day of class is something different and new. I have found myself enjoying the class a bit more towards the end of the quarter rather than the beginning. It is an easy class, but you have to be awake and ready to go.

I really enjoyed the way the class was structured and the style of teaching and varied learning methods used throughout the course.

I really liked Dr. O'Brochta. He cares greatly about his students and the subject.

I really liked this class

The class was decent and very informative.

Sometimes I found myself very confused in this class even with explanations from the teacher but I found it really fun and enjoyable

Dr. O'Brochta did an amazing job at teaching straight forward knowledge of the course without ever inflicting his own agenda/propaganda on it as well. I can not stand government or anything to do with politics. Dr. O'Brochta made the class not just bearable, but also a bit intriguing and knowledgeable.

I loved Dr. O'Brochta. he made government and politics interesting.

Fall 2022:

The most phenomenal professor with the best attitude.

Dr. O'Brochta is a great professor and is very helpful in his class and his office hours. I wish I had more classes with him!

I love Dr. O'Brochta as a 300 level teacher! He is very engaging and challenges us to do better in class and as students in general. I found many assignment to be difficult, but he worked with me through office hours. I will say that I found the workload to be quite extensive at times and this should be advised for students going in.

I loved the UN simulation, it has actually made me think about taking a career in IR and the UN.

Fall 2021:

Dr. O'Brochta does a very good job of teaching this class.

Winter 2022-2023:

Dr. O'Brochta tries to make sure that everyone understands the material that he is teaching. He also tries to convey it in a way that we all understand the difficult concept, unfortunately sometimes the concepts are too difficult to get so he will try to make sure that you understand it if you attend his office hours.

Great class, taught me so much on data and how to apply it and understand it in the context of geopolitics and politics in general. For my historical background its been wonderful to apply it in my studies.

Dr. O'Brochta remains a fantastic professor. He cares that his students learn the material and do well in his course.

Great Professor! See you next quarter!

Great professor ! Absolutely always available to the students! Always answers and is concerned about how you are doing in class !

I feel like he is a great teacher. He really has a lot on his plate and I feel like a student teacher could help with answering questions or being available when he can not be present or available. He does a great job of trying to help everyone and getting grades in. He is a very nice person and really wants to challenge his students because he knows they can do it if they put in the work. When we try and still need help he does not mind helping his students at all. So overall he is a very great teacher and he needs to be appreciated!!

This class is very difficult due to the pace and content. Honestly it need to be two separate courses because the coding for this project is very time consuming and is hard to keep up with while also doing group projects and interviews. The group interviews and surveys should be a separate class that way we can spend more time learning R

Honestly, I don't see the reasoning behind the teaching of this material. However, the teacher tried his best to help us understand and learn the material.

I can sincerely attest that Dr. O'Brochta has presented more effort towards his students than any other professor, instructor, or teacher I have ever had. He makes himself regularly available for office hours, which he ensures are genuinely impactful for students for regarding both course content and extracurricular activities. Overall, I've had the most amazing experience taking a class with Dr. O'Brochta, and I'm very thankful for that opportunity.

Winter 2021-2022:

I would not be exaggerating if I said that Dr. O'Brochta was likely the best professor I have had in general (not the put down others). The course he teaches contains both difficult (at least at first) and new content that many have not encountered before and yet he is able to, provided questions are asked, to explain things in such a way as to allow for proper answers to be given. Furthermore, his coverage of the class in terms of helping them has seemingly been extended beyond what one would expect as, despite continually shifting around the class constantly to help, he is able to eventually provide answers in the event those asking them are patient enough to ask.

I believe Dr. O'Brochta has been a excellent addition to Louisiana Tech and would have like to have the chance to have taken more of his classes during my time at Tech.

Dr. O'Brochta has to be the best "first year" professor in Tech history... He is the smartest and most well spoken professor I've had in the college of Liberal Arts besides Dr. Brenda Savage. He absolutely needs a TA for this class. There is too much content and too many students for him to effectively make sure we ALL understand the content. Dr. O'Brochta also has the best style. I love coming to class to see what he will wear, and his bunny memes are very nice to see when I'm drowning in code or in work from other classes. Tech, hold onto Dr. O because he deserves the entire world! He is so committed to his job.

My performance in this course should not reflect him. He is an excellent professor and his major and math makes him extra qualified. I just could not perform well-enough given my history in learning math among other factors.

Professor O'Brochta takes time to get to know his students. He constantly checks in to see if you understand the material. Great professor.

Amazing professor and a great class! A pleasure to work with.

i dont think i know what is going on with R.

I have learned more about political science in this single course than I have in all of my courses combined at Louisiana Tech. I have learned how to code in a program called R, which I thought would be impossible for me to try to figure out. I have been able to discover a passion for a topic and learn different methods to research it by. Although this course has been challenging and time consuming, it has been extremely beneficial and has increased my confidence in my major two fold.

Hardest class Ive had at Tech, best professor.

Dr. O'Brochta is one of the most helpful professors I have ever had. Everything we need to know about the class is listed in the syllabus.

Overall, I think Dr. O'Brochta is a great teacher for this course. I came in to this class with a lot of anxiety just because of what i've heard, but Dr. O'Brochta was always really helpful.

Dr O'Brochta is always beyond willing to give help and accommodate in any way he can. He also gets feedback to us on assignments in a timely manner, which is appreciated.

This course was quite challenging, but it is designed to be so. Dr. O'Brochta was always available to answer questions and his responses to emails was almost immediate. I liked that he provided us with the rubric at the beginning of the course so we knew exactly what was expected of us. This course was easily navigable in terms of deadlines and organization, which allowed us to focus on producing quality papers.

Dr. O'Brochta is Tech's newest gem. Please keep him. I have not been impacted by a professor like I have been impacted by him. Give him the right materials and rules and he will come back with great grades and great interactions with students.

Even though he is relatively new, I can really see how much Dr. O'Brochta is investing in the university and his students. I really respect the way he's trying to connect with students and actually invest in our dwindling department even after only just arriving.

Excellent organization and awesome group project for the end of the quarter. Dr. O'Brochta has taught me more about political science in one quarter than any other professor in college. He makes us feel passionate about what we are doing and cares about students and the university.

Dr. O'Brochta is a great professor that really cares about student success. I was really proud to be a part of this class and creating this proposal to improve student life on campus. Dr. O'Brochta is really making a difference at this university.

Very appreciative of a class that allows for student led discussion/projects and use of the degrees we seek to obtain.

This course and Dr. O'Brochta convey and present the information relevant to the course in a very interested and engaging format. The College of Liberal Arts and Tech as a whole would greatly benefit from giving him the agency to form and undertake courses such as this to engage students in their education while providing positive outcomes for the university.

I have said it in a previous course with him, however, I must reiterate that Dr. O'Brochta is the best educator I have encountered at this institution and the university would benefit from continuing to host him and his teaching.

Dr. O'Brochta is a great professor and I wish he wasn't leaving. He makes sure that everyone understands the material and makes sure that everyone has a chance to share their opinions with the class. Overall, Dr. O'Brochta is an amazing professor and I wish him nothing but the best at his next college.

The most enjoyable and educational class I have taken in my time at Tech and it was an 8am with an incredibly high workload. 10/10

While the course was very loose it was great learning about developing nations with Dr. O. I thoroughly enjoyed the class and felt I have learned more as a political scientist from this course.

Dr. O'Brochta did an amazing job teaching his last class at tech and I'm said that he's going to be leaving.

Great class and very interesting at times. Cares to make sure students are understanding and grasping the content of the class fully. Mentions India a lot.

I'm gonna miss you Dr. O :)

I am so glad that I was able to have you as professor! I feel that I have learned a substantial amount of information in a fun environment. Very sad that you are leaving, but I wish you the best of luck with all you endeavors. #thecatmemeswerentthatbad

Great Professor, confident about what I learned in this class.

My only qualm with Dr. O'Brochta does not even fall under his responsibility: it is that I will not have more opportunities to take his classes. He is more in tune with his students than any professor I have ever had; his ability to catch and retain a classroom is unmatched; and he is the most helpful person I have ever met.

Dr O'Brochta is easily one of the best professors I've ever had. He managed to keep everyone engaged with the topics we discussed. He single handedly got me out of a learning slump through his teaching style as well as his overall demeanor.

Summer 2020 Arts & Sciences Instructor Report for SU2020.L32.Pol Sci.3171.21 - Topics in Politics: Representation Identity and Dissent (William O'Brochta)

Course and Instructor Evaluation

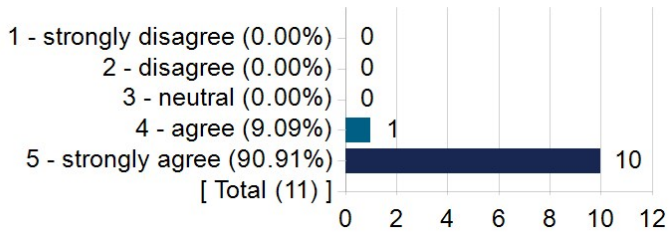

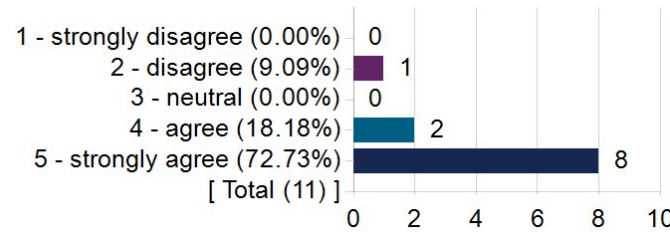

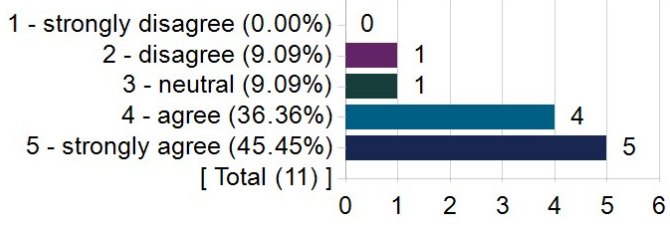

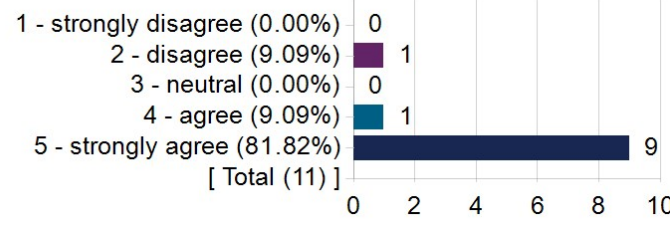

Past research shows that the students' answers to any one question can be noisy, more prone to biases, and provide less useful data for evaluating courses and instructors. Since interpreting individual questions, including their relative highs and lows, can easily lead to inaccurate conclusions due to low reliability, individual question responses are not available in any standard report.

However, combining students' responses to several questions aimed at measuring the same underlying attribute can improve the quality of the measures. Therefore, the statistics displayed for each attribute (mean, median, mode, and standard deviation) are calculated from the grouped responses to all the questions in each topical block.

All questions below use a 5-point response scale: 1-strongly disagree to 5-strongly agree

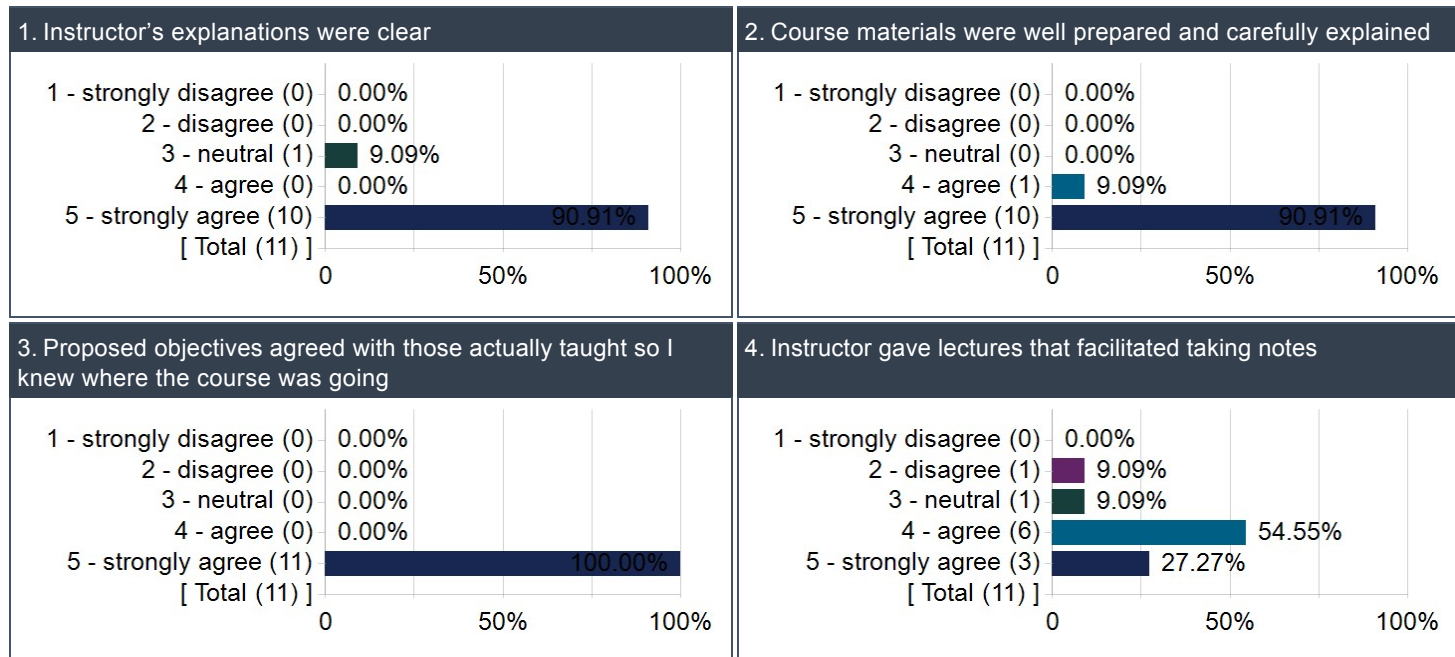

Learning

Competency Statistics		Value
Mean		4.57
Median		5.00
Mode		5
Standard Deviation		0.85

1. I have found the course intellectually challenging and stimulating  1 - strongly disagree (0.00%) 0 2 - disagree (0.00%) 0 3 - neutral (0.00%) 0 4 - agree (9.09%) 1 5 - strongly agree (90.91%) 10 [Total (11)]	2. I have learned something which I consider valuable  1 - strongly disagree (0.00%) 0 2 - disagree (9.09%) 1 3 - neutral (0.00%) 0 4 - agree (18.18%) 2 5 - strongly agree (72.73%) 8 [Total (11)]
3. My interest in the subject has increased as a consequence of this course  1 - strongly disagree (0.00%) 0 2 - disagree (9.09%) 1 3 - neutral (9.09%) 1 4 - agree (36.36%) 4 5 - strongly agree (45.45%) 5 [Total (11)]	4. I have learned and understood the subject materials of this course  1 - strongly disagree (0.00%) 0 2 - disagree (9.09%) 1 3 - neutral (0.00%) 0 4 - agree (9.09%) 1 5 - strongly agree (81.82%) 9 [Total (11)]

2. Course workload relative to other courses was

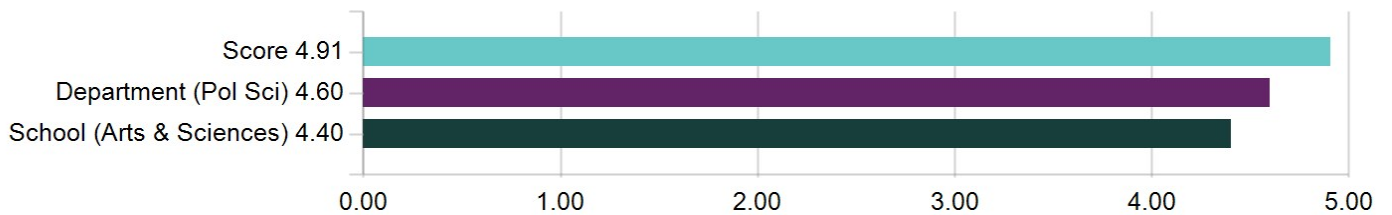

3. Course pace was

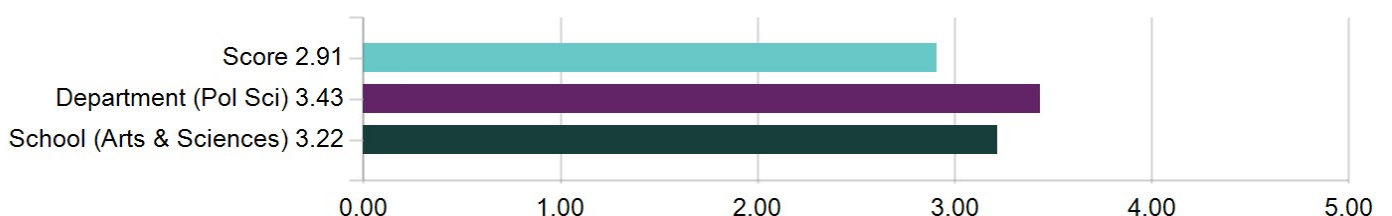

4. Hours per week required outside of class

5. The instructor used technology (e.g., Canvas, Zoom, etc.) effectively to support learning in this course.

6. Would you have preferred more or less synchronous (live) engagement in this course?

Short Answer Responses

What would you like to tell other Wash U students thinking about taking this course?

Comments
This is an extremely challenging course. Students should be prepared to write a comprehensive research article within one month.
Great course with very interesting and stimulating topics.
It is a lot of work outside class. However, the work is worth it and the course is well organized to make time management doable.
Heavy coursework but very valuable in learning about and different identities and representation. Makes you better at writing a research paper.
This class is a ton of work, be prepared to put in some serious hours – yeah the class is accelerated but even on top of that. This is a lot. Professor O'Brochta is a solid guy and genuinely cares a lot which is cool though. It is just a lot of work.
This professor is so enthusiastic and knowledgeable. Instead of grading harshly, this professor takes a genuine interest in improving the skills of his students by offering in-depth comments and feedback.
This is an excellent course, especially if you are interested in political science! You learn how to think critically about many different political science issues and you also learn how to conduct research, which is crucial if you want to continue in the field of political science.
Professor O'Brochta was phenomenal and just a joy to take a class with him. He is very quick to respond, goes out of the way for his students, is adaptable, and gives very helpful feedback. He does everything in his power to help you understand and gain something from the course material and truly cares about the course and his students. The course is incredibly topical and does a great job of relating material to present day. It also does not matter what your educational background is, as my class was filled with students from all areas of study and we all kept up.
Do not be afraid to take this course if you are not politically experienced! I really enjoyed this course as someone new to polisci and I have learned an incredible amount about this area of study. The course is very engaging and has a heavy workload, however it is very manageable, not too difficult, and appropriate. I really enjoyed this course and took away more than just the curriculum.
too much work, take sth else
This course was much more writing intensive than I was expecting, but at the same time nothing felt like busywork. It is a great course to learn how to write a political science research article with the emphasis on the content rather than the minutia of writing ability one may find in grading structures of English courses.

Describe at least one thing about this course that helped you learn.

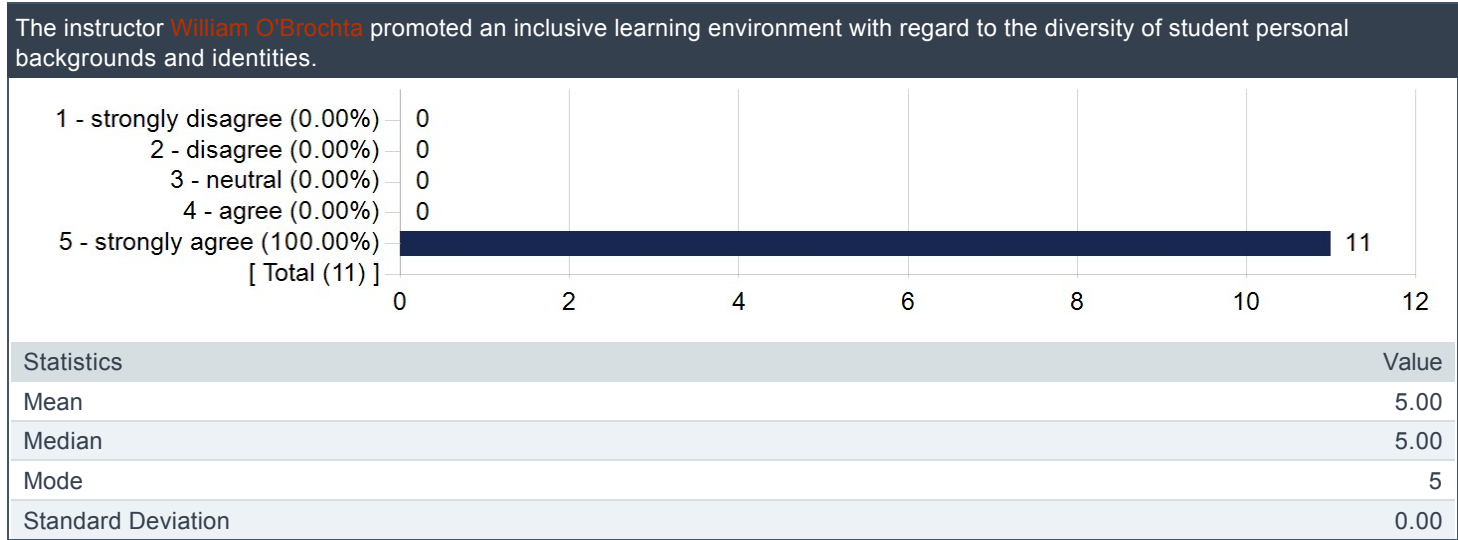

Comments
Professor O'Brochta really wants to help us to learn. I really appreciate his detailed and thorough comments on my regular blog and any other assignment.
The instructor offers exceptional feedback and support.
We had to write constantly which helped me become more comfortable expressing myself with written words.
Constant writing practice and structure for political science literature.
Professor O'Brochta's availability helped a lot – he was always willing to answer questions and his directions were usually very clear.
I really appreciated all of the group activities because it gave me a chance to really get to know other people in the course, even virtually, and digest topics through conversation.
Every assignment was discussed in detail in class, and expectations were very clear. The organization of the class made it less stressful than other classes I have taken.
Professor O'Brochta's feedback was instrumental in adding to my overall knowledge of course material. While I was able to complete assignments on my own, having the chance to review my work after receiving his feedback was very helpful, as I was able to evaluate my work in a new light that helped me to see my flaws and make appropriate changes.
As much as it was a little intimidating, conversations and discussions with various groups were really engaging and kept me on top of assignments.
The biggest thing I learned that I will take with me was how to write a political science article. This felt like a very daunting task before the course, and now I feel confident in my ability to do it for another class.

Describe at least one thing that could be changed about this course to help you learn.

Comments
This is really an excellent course. One thing I want to change is that I wish I can take this class in the form of face-to-face so that I can have the opportunity to meet people from OYC which is a local organization that we are trying to help and provide policies to solve environmental racism.
The workload could definitely decrease a little bit to allow more focus and energy on important assignments.
Tie lectures back into the readings more.
Some of the busy work like commenting on other peoples blogs could be cut. Just felt like that was really unnecessary. Also I know you keep a tight schedule but sometimes we really didn't have enough time for breakout room activities and were just throwing stuff together when the 60 second timer came up.
Nothing!
Obviously, online format was challenging at times and the course probably would have been better in person. That being said, it was about as good as it could be online. There was a lot of writing, and I know it was only a 5 week course, but it might have been better if we started writing a lot more in the second week of class, as opposed to the beginning of the third week just to break it up a bit more.
I think it would be interesting if students were allowed to suggest readings for the course based on our previous knowledge of some material. I think having students come up with 2-3 readings for the course is something new and inventive, and I know the students who didn't choose the work would be especially interested in engaging with readings that were brought to the table by their classmates.
I honestly cannot think of anything specifically critical. As a business school student, the long readings (which may not be considered long to art sci students) were a little intimidating. But I think that is subject to me personally.
I felt like this class was too fast paced. I have never taken a summer course before, so I don't know how it compares to other courses of the same length, but it was much more than I was expecting. The synchronous classes were the perfect pace, but I struggled to keep up with the assignments.

Classroom Environment

The instructor **William O'Brochta** promoted an inclusive learning environment with regard to the diversity of student personal backgrounds and identities.

Where relevant, please give specific examples to explain your answer above.

Comments
I can't think of a specific example but he made sure there was equal opportunity to succeed for everyone regardless of their experience in political science.
We read research articles by authors of many different identities, backgrounds, and life experiences.
Professor O'Brochta was fair in his grading and feedback and helped all students no matter their background or identity.
Professor O' Brochta was engaging and very encouraging of unique perspectives and experiences. I think he did an amazing job highlighting the experiences relevant to now. For example, Ben wrote a blog about the Hong Kong protests as he is in China currently. We spent a good amount of time discussing them and Professor O'Brochta engaged him and other Chinese students in discussing their perspectives. Things like this made me appreciate his leniency in our blog discussions even if they were a little off-topic from the reading question. I think this lack of sticking to the topic on hand facilitated healthy, diverse conversations that still remained relevant to the entire course. I enjoyed that a lot of our conversations emerged out of this and were not exactly planned by his curriculum verbatim. I believe this heavily contributed to me engagement and what I took away at the end of this course.
He gave everyone the chance to comment or ask questions in every class. While people in my spring classes didn't ever seem eager to participate, I never noticed any lulls after William asked our class questions. He also gave us our own individual pages with our names pre-labeled in shared powerpoints where we had space to share our ideas in almost every class. We would split into smaller break-out groups to discuss our ideas, which gave everyone the ability to be actively included. He did a great job during the break-out group times switching between groups to help out.

Personalized Questions

What were some of the most helpful, interesting, or thought provoking readings, assignments, or in-class activities that you would like to see when this course is taught again?

Comments
Policy day really helps me to apply our knowledge and think about potential policies as a country's policymaker.
Research Project and Blog Posts
The reading on women's representation in cabinets was awesome. I thought the blog writing was great because we had to reflect a lot on the readings.
Keep the readings you have. Very interesting and thought provoking.
The breakout rooms were generally really solid, albeit sometimes a little too short. It was always good to talk stuff over with other students. Plus they are way way more engaging than a standard zoom lecture – it gets really hard to pay attention to lecture after a while. So the way breakout rooms were used in this class were really good. And having us write our research paper in parts was obviously a good move, and your quick feedback on each individual part was really helpful.
Blog entries!
The research article assignment was my favorite from a learning perspective, though policy day was quite engaging as well.
The readings that were focused on ethnic identity and women's right really stuck with me the most. I enjoyed completing the blog reflections throughout the course, especially as I compared the readings with in-class discussions or current events. The readings/blog posts were a major component of my enjoyment with this course.
I really enjoyed the first few readings that discussed the definitions of ethnic identity and the term identity. Perhaps this was because I had not done any political science readings in my past so this was a cool perspective that engaged me. I loved these types of 'definition exploring' readings as they pushed me to analyze what I thought was a concrete term into an abstract variety of meanings which I had never thought about before.
I really liked the policy day activity. It was interesting and felt like a great way to prepare to include policy proposals in our individually assigned research articles.

An alternative version of this course lacks the community engaged, public policy, and research article writing components that were present in this course and replaces them with more readings and lectures. What are aspects of the course you took that you prefer to an alternative version of this course?

Comments
We are learning not only based on the academic concept, but also on how to apply these concepts to real life. We reflect on readings and group discussions to come up with our own interests in particular issues that we want to study.
policy day was very exciting and helpful, would definitely recommend keeping this part
I think the research and public policy assignments were essential in understanding how identity, representation, and dissent affect decision making.
I enjoyed the writing components as that helped me improve those skills. Also, the community engagement aspect helped give a live example of what we were learning about.
The community engagement project is genuinely pretty cool. I honestly wish it had been a bigger focus, especially relative to public policy/research parts, because we could have produced something much better if we were putting a lot of time into that versus the time we were putting into other stuff.
I am confused by this course
I certainly prefer the element of community engagement, as it makes the course feel much more applicable and grounded in reality. The research article assignment is also very good for anyone interested in political science or even just social science more generally.
I really enjoyed that the research article was a component of the course that was completed throughout as an assignment that took a month to complete. It was helpful because portions of the paper did a great job of connecting to the discussion in class and then other parts of the paper involved independent research. I also enjoyed the community engaged aspect, even if it was tough with remote learning.
I enjoyed the community engagement as it related to my personal RQ, however, I could see how others may not feel like it heavily contributed to their learning experience. I felt like it was a great way to learn more about a place we are all connected to in a real-world application, so for that reason, I enjoyed it. I also think the research article is a critical aspect of this course. I cannot imagine this same course without the research article. I felt like the article also kept me on my feet and engaged across the curriculum. Those first two (maybe one?) week without it was a little less organized, in my opinion. However, this could be due to the fact that it was the first week and I was adapting. I am confident that the removal of the research article aspect would have made me less engaged overall.
I can't imagine this course without the research article. I felt like that was the backbone that guided everything. While I signed up for the course for the information in the readings, the research article was by far the most useful thing for me to learn.

An alternative version of this course lacks the community engaged, public policy, and research article writing components that were present in this course and replaces them with more readings and lectures. What are aspects of the alternative course that you think you would prefer to the course you took?

Comments
Maybe read more articles and learn more political concepts of representation, identity, and dissent.
The community engagement was a bit difficult over zoom
I would not prefer any aspects of the alternative course.
Cutting policy day would have been totally fine. It just felt like something to get through, just another assignment. I also would have been more than happy to not write the research article but that's probably non-negotiable. But if you ditched policy day and put that time into community engagement project stuff instead, the result from that would be better, I think.
I cannot imagine a course better than this one considering the circumstances
More lectures on specific issues might have been beneficial, but I certainly don't feel like they were missing. I also don't think we needed any more reading. I would prefer this course to the alternative version in pretty much every way.
In regards to my specific research paper, it was tough to create a solution for the public policy, so that made it difficult for me to engage fully with the public policy. The "new course" would be interesting because I definitely would get a wider scope of readings and lectures, but I really enjoyed the 3x per week meetings, I think 5x would overdo it and detract from the parts of the course we completed on our own.
I think the way we discussed the public policy in our course was not necessarily emphasized enough to impact my experience/knowledge on the subject. Therefore, I think removing it would not change much of the course. However, I would prefer to see that be further emphasized and made concrete by more applicable examples in the curriculum for other students.
If this course happens over zoom again, I would have preferred the class times spent on the project with OYC to be replaced with regular lectures. I don't think the project felt that relevant when we weren't actually interacting with them.

WashU Summer 2019 Instructor Report for SU2019.L32.Pol Sci.102B.21 - Introduction to Comparative Politics (William O'Brochta)

Project Title: **WashU Summer 2019 Course Evaluations**

Course and Instructor Evaluation

Past research shows that the students' answers to any one question can be noisy, more prone to biases, and provide less useful data for evaluating courses and instructors. Since interpreting individual questions, including their relative highs and lows, can easily lead to inaccurate conclusions due to low reliability, individual question responses are not available in any standard report.

However, combining students' responses to several questions aimed at measuring the same underlying attribute can improve the quality of the measures. Therefore, the statistics displayed for each attribute (mean, median, mode, and standard deviation) are calculated from the grouped responses to all the questions in each topical block.

All questions below use a 5-point response scale: 1-strongly disagree to 5-strongly agree

Learning

Competency Statistics	Value
Mean	4.58
Median	5.00
Mode	5
Standard Deviation	0.65

Comments
This course explains some important topics of the comparative politics, such as political culture and voter behaviors. It is challenging to think about your own research questions and come up with the ways to solve that, but you will definitely enjoy it and get so much things at the end of this course.
While this course is writing intensive, the daily lectures on comparative politics are really thought provoking. You will learn a lot.
as an intro course, it's a fairly simple course that goes over and through overarching concepts in competitive political science. It has a pretty heavy workload with assignment due every class, sometimes in addition to other assignments but the assignments themselves are easy.
Meet with the professor a lot. Be prepared to spend a lot of time on the reading journals
The summer class was extremely beneficial to my learning in both political science and as a whole. If you have any interest in political science, social science, or the humanities I highly recommend taking this course. The workload can be difficult but at no moment will you think that you're wasting your time.
This course is a great way to get an introductory viewing into the world of comparative politics, just as it is advertised. I took it over the summer, so it was very fast paced and the workload was very heavy, but I was able to keep up with this and other classes. The professor is great and he is genuinely very passionate and interested in the subject.

Describe at least one thing about this course that helped you learn.

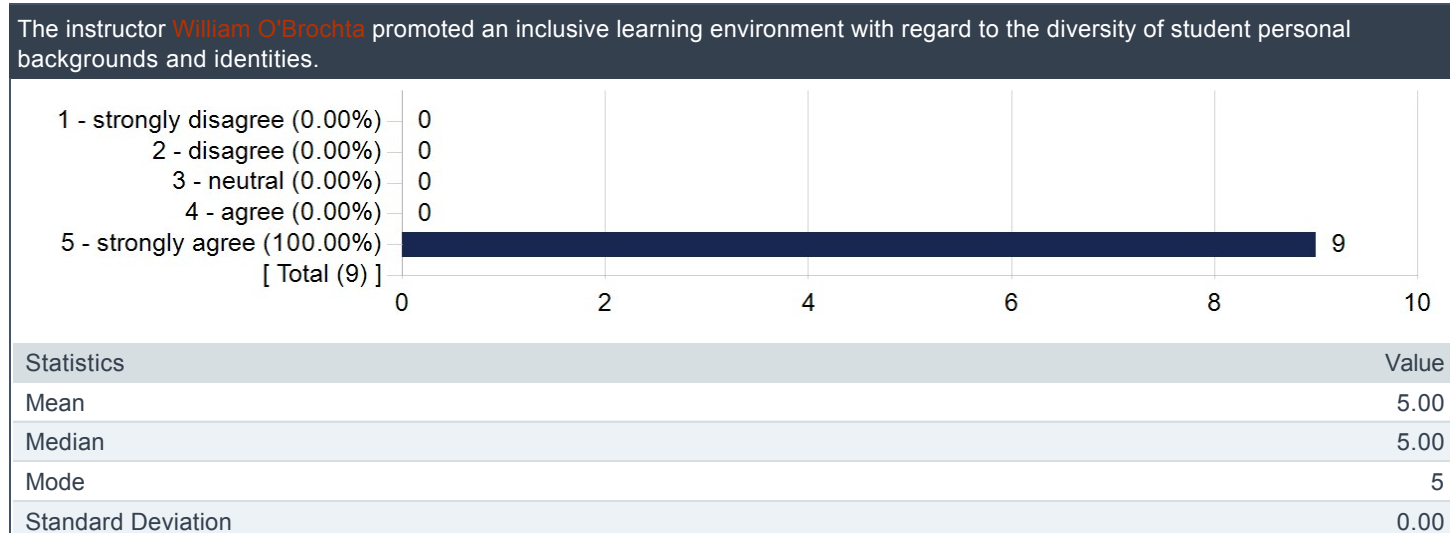

Comments
Working on the research article over the course of the whole semester really helped me learn about how political research is conducted and allowed me to make connections between articles we read and topics we covered in class.
Going to the office hours.
Group work or class discussions made me formulate my own opinions on political topics. Having to think in this way gave me a new understanding of the subject matter.
The reading journal, daily assignment, helped me actually understand the articles by making me summarize them. Some statistics was incorporated that helped me understand the research components of the assignment.
Doing the research article made it easier to read other academic journals and made me like political science methodology a lot more.
Reading the journal articles and the discussion based classes were the two most prominent things that helped me in this course. The articles gave a concrete view into political science that elevated this class significantly above a high school class which level 100 classes sometimes cross into. The discussions were intellectually stimulating and broadened my view on the topics.
There was a lot of information readily available to me that helped me learn and absorb all of the necessary knowledge to succeed in this course.

Describe at least one thing that could be changed about this course to help you learn.

Comments
Because we read journals almost everyday, the topic changes. And i think it would be good if the linkage between these topics could be mentioned a little bit more.
More mandatory speaking exercises like the 3 penny exercise we did on the topic of social welfare institutions in the united states. Everyone spoke about how they saw the issue in a civil discussion
A little more directed discussion. Sometimes there could be a lull in the class when students rather didn't have an answer or were too tired to answer. A little direction/ simplification of the question asked would make it easier to answer and push the discussion forward.
Lower requirements for full credit on reading journals. I felt like I was just trying to fill up the page in order to get full credit
1) From what I can tell, political science is based in research. Although it is difficult both pedagogically and for students, incorporating activities that either mimic or that practice researching a topic (beyond the components in the research article) would greatly augment my appreciation and understanding of political science. 2) The readings often discuss very specific topics in very broad fields research and I don't always feel I understand what the generalized field is about even if I understand the reading. But after the class for the reading, I feel much more confident i understand the field as a whole. To both enhance my understanding and the connectivity of the course, the reading questions (which are about the whole field) could be moved to the day after their respective readings are assigned. This change could cause students to think of the various fields we study beyond the assigned day and also allows us to approach the reading question with a deeper understanding.
Maybe just a little bit slower would help with the stress.

Classroom Environment

The instructor **William O'Brochta** promoted an inclusive learning environment with regard to the diversity of student personal backgrounds and identities.

Where relevant, please give specific examples to explain your answer above.

Comments
William does truly respect everyone and gives everyone opportunity to bring up his or her idea to the class.
Each research article was essentially personalized for each student so they chose what topic interested them most and worked on trying to incorporate it into a formal research paper.
Since I see no other place to put this i will put this here. I do not know if he is looking to continue his career at WashU but William O'Brochta is pedagogical prodigy. He has consistently demonstrated an unusually strong ability to teach and more importantly has the passion and drive to constantly improve himself. His teaching even exceeds many of my previous, tenured professors. William O'Brochta would be an incredible addition to any department. His presence should be viewed not as a cost but as a high-dividends investment.

Personalized Questions

What were some of the most helpful, interesting, or thought provoking readings, assignments, or in-class activities, that you would like to see when this course is taught again?

Comments
I really enjoyed policy day and think it was informative in showing me how policymaking can be very complicated.
The Policy Day is really fun.
I really enjoyed the civil war reading and class discussion. As previously mentioned, I also really enjoyed the mandatory class discussions like the one on social welfare institutions. Also, professor O'Brochta was always on time grading and up front on what he expected of us. More Poli Sci classes need to use the canvas weighted grading system he used and updated daily. We were never kept in the dark with how we stood in the class and more professors and courses should take professor O'Brochta's example.
The research article is the best part of this course
Although the research article can be improved, it undoubtedly was a key reason this course was so impactful. The policy-day in particular was a great learning experience.
There was a lot that I don't know about politics, being new to the whole scene, so a lot of the readings were interesting to me, especially because I just didn't know anything about them. However, I really thought about the misinformation one.

A different version of this course includes much more game theory/formal theory, has multiple choice exams, covers fewer topics, and is delivered in a lecture format. What are aspects of the course you took that you prefer compared to this alternate course?

Comments
The interactive nature of this course facilitated more engagement and made me connect more with the material. In addition, writing the research paper will help me retain more information than taking exams would have.
Having more topics to talk about because this is an intro class and people taking this course might want to know more about comparative politics and political science,
I liked how the lectures were engaging purely for the learning aspect not to write down everything for some exam. I liked how the class had writing projects.
I preferred the reading responses/article to exams and the application to real world problems
I liked focusing mostly on our articles because that was the most rewarding part for me.
Based on the formal theory we looked at in class, an emphasis on game theory/formal theory is a mistake. I have taken 400 level economic courses and the formal theory was still unnecessarily difficult to understand for a course at this level. If possible, basing this class on essays is a much more accurate measure of understanding than mc exams. Fewer topics might be beneficial, but there is still benefits to breadth. Like in this class, lectures should be minimized as they do not consistently stimulate critical thought. This version of the class seems definitively better than the different version.
We never had any exams. There is a lot of information that we cover, so it would have been difficult to have been tested over it, but additionally, the group discussions and the reading journals we had on subjects were very helpful to me to learn the material. Additionally, I do like that we covered a lot of information. Yes, it was in a very short amount of time, but I'm going to school to learn so I'm glad that's what we did.

A different version of this course includes much more game theory/formal theory, has multiple choice exams, covers fewer topics, and is delivered in a lecture format. What are aspects of this alternate course that you would have liked to be in the course you took?

Comments
Perhaps covering fewer topics would be easier, but I liked how I got learned a little bit about a lot of different topics.
I would have preferred if the class was evenly split between exams and research article writing. I think the research article made it so my work out of class was solely based on that one topic rather than exploring multiple topics.
I would honestly like some exams because it felt like the lectures were a little pointless since we were not being tested on them.
Slightly more lecture/generalized information-input may benefit. Combining this with fewer topics would allow for a much deeper understanding of each topic. A deep understanding of each topic is the primary fault of this otherwise well-crafted and well-taught class.
Maybe more game theory? I'm not too sure what that is so I can't make a definitive statement on it.

Comments
This truly is a writing intensive course but the feedback given will really help you improve your writing. The readings are all very interesting and intellectually stimulating and the professors are amazing.
It's less about immigration policy and more about immigrant identity and how immigrants use technology as a reflection of their identities and situations
Interesting course
Great course, loved the prof, interesting papers and discussions
This course has more writing than most WIs.
I very much enjoyed this course and would recommend it to other students. It is a writing intensive course so the workload is a bit heavy, but the readings are interesting. The class is very much discussion based which I enjoyed.
It is a very well-taught and interesting course
It's a lot of writing, but take your time with the assignments, you'll learn a lot from them.
Fascinating class if you are remotely interested in immigration, identity or the internet. Not like other more traditional writing intensive classes (e.g. Argumentation or Exposition) but engaging and provides you with a lot of information.
If you are interested in immigration, this class is incredibly interesting. It's cool to hear about what your other classmates have to say about the discussed topics, and Professor Parikh and William are both incredibly well informed on the issues.
Professor Parikh and William are both really passionate and knowledgeable about the subjects being taught. The class is definitely discussion based and hearing different ideas and experiences based off of the readings has been interesting. Most of the learning is audio (because discussion) and it IS a writing intensive class so there are a lot of reading journals due that you need to keep on top of.
The work load is quite substantial with the two page required responses so just make sure you plan accordingly because they creep up on you and take longer than expected.
The topic is super interesting and all the texts you read for the class are as well. However, having to write writing journals before every class can be very time consuming and some of the projects are sometimes more busy work than I would have liked. I felt that in general I didn't have enough time be able to do everything for the class (though I had a very full course load). Also, the classes—though has room for participation—are very lecture based (without any visual aids) which can get a little tiring.
The content is interesting and covers a wide variety of topics. I would perhaps look at a copy of a syllabus beforehand. The workload is kind of rigorous and this is not an easy class. However, the conversations, for the most part, are rewarding.
While it is a lot of work, Professor Parikh and William are fair graders and want you to succeed.
Writing heavy, but interesting material
Make sure you have enough time for the class as it is extremely time consuming.

Describe at least one thing about this course that helped you learn.

Comments
Allowing us to go through a draft phase with our papers and having one on one meetings with either Sunita or William helped me in the writing process, especially because I haven't had to write consistently for a class since Writing 1
discussing the readings in class
Reading journal
Did lots of readings and reading journals which helped you actually digest what you were reading
The Reading Journals were helpful in that they forced me to summarize the readings before class and pick out the points I thought were the most interesting.
The professor explained everything clearly and thoroughly
The reading journals were an effective way of keeping up with the material.
Teachers utilized a wide ranging of teaching styles to ensure students were engaged (presentation, group project, essays, discussions, peer review). Teachers also actively sought out feedback from students both at the beginning of the semester and in the middle and were always willing to meet for appointments.
since the class was discussion-based, it was really useful to hear other peoples' interpretations of the readings, and that helped me learn.
I definitely preferred the articles in the later half of the class compared to the beginning and I thought they were easier to discuss. Also it was helpful when people summarized the articles being discussed that day. I also liked group work
The interactive aspects of the course and small group feel.
I think requiring reading journals definitely makes sure people do the readings for each class and helped me learn more about the topics. However, instead of having to do two every week it might have been more manageable if we all had one day a week that we had to do (like every Wednesday, for example) because it was frustrating knowing that you worked hard on a reading journal and then not even having that one graded.
Because the readings were implicitly mandatory, I learned a lot through this and was able to explore topics at depths and find what resonated with me.
Class discussion is highly emphasized
The conversational style of class allowed me to feel very comfortable talking to the professors.

Describe at least one thing that could be changed about this course to help you learn.

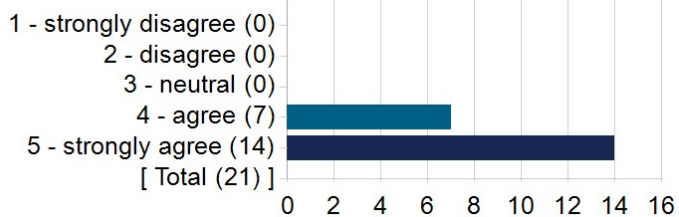

Comments
I think the expectations for the course and for the writing could be spelled out a little clearer, especially before drafts.
the group activities weren't worthwhile
Less and more deliberate readings would be helpful in order to gain the most possible out of them. A clearer grading standard for assignments would also be helpful. Often times it feels in the comments that I am being criticized for not doing something a certain way or making a certain argument which is difficult because I feel like I spend most of my time on this class.
Maybe more group projects?
Some more notes provided to help follow along
It'd be helpful if some class notes were posted on Canvas.
Daily reading journals were very demanding and added immense stress to this course. Although the point of ensuring everyone did the reading made sense, thoroughly reading the 2–3 articles already took up quite some time so writing an additional reflection was burdensome.
Major assignments had "clear instructions" on the rubric assignment but grading seemed somewhat arbitrary from student to student. For instance, not clear what distinguished a 91 paper from a 94. Also, appeared that Parikh and William had different grading scales, so grades differed depending on who was grading your work.
The class was completely based off of the readings, which was fine and kept everything interesting, and while all of the readings had something or another to do with immigration, at times it was difficult to see what point exactly the readings as a whole were supposed to reach in terms of the class. I feel like I learned a lot about immigration and the many facets of it, but I'm not sure for what purpose I was learning it.
Some of the reading journals were really hard to understand and I'd get lost quite frequently. Also when the entire class was just discussion with no visuals it was sometime hard for me to stay focused.
I feel like lectures could have been more substantiated with use of more technology and notes.
I mentioned it above, but maybe revising the way reading journals are used to make it more manageable.
I think foregrounding assignment expectations ahead of time could have been done better. It felt often unclear what was expected from each major project component, and these guidelines were not established until pretty close to the due dates. The syllabus felt often open-ended and did not answer all of our questions.
Fewer reading journals
Less reading.

Comments
William really contributed to class discussions and gave strong feedback for writing samples
While the reading journals made sense to ensure that all students regularly read and were able to participate in discussion, it was difficult to keep up with the volume of work and was frustrating because the majority of assignments were not graded.
For some assignments, such as the group project, it felt like components that were not emphasized as important in class explanations of the assignment were very important factors in grading, so there was a slight mismatch there.
I liked that you wrote on the board during the discussion although sometimes your handwriting was really hard to read.
He is fantastic.
